32 Reported Dead in Appalachia Floods

Cars were stacked up in Virginia after floods caused by more than six inches of rain. Hundreds were left homeless and thousands without power. Thirty-two persons died. Twenty people were listed as missing in West Virginia. While the rains had ended in most places Wednesday, flood warnings remained in effect for Virginia and Maryland. Damage was put at hundreds of millions of dollars.

Jaruzelski Gives Up One Post, Assumes Another

WARSAW — General Wojciech Jaruzelski, the Polish leader, stepped down Wednesday as prime ister but assumed the ceremonial post of state president when the parliament elected him chairman of the Council of State.

General Jaruzelski, 62, the army general who declared martial law in 1981 to crush the Solidarity trade union, retained his title of Communist Party first secretary, the most powerful position in Poland. A Politburo member, Zbigniew

lessner, was elected as prime minister and asked to form a govern-General Jaruzelski's election to

the state presidency underscored the belief that he would remain the dominant political figure in Po-land. He replaces themyk Jab-loust as president.

General Jaruzelski's resignation apparently signaled the end of the political crisis that led to martial law and suppression of the Solidarity labor movement in 1981.

The Communist Parry, the real power in Poland, is believed to have lost nearly one million members after labor turmoil in 1980 gave rise to Solidarity.

bewildered over the episode. Senior intelligence officials said it remained unclear whether Mr. Yurchenko was a participant in a Soviet hoax or a genuine defector who had changed his mind.

Several officials said Mr. Yurchenko had been disappointed by the collapse of a love affair with a woman in Canada and angered by a succession of news stories about

Congressional leaders said they had questioned the CIA about Mr. Yurchenko and had been repeatedly assured that he was trustworthy. Senator Patrick J. Leahy, Democrat of Vermont and vice chairman of the Senate Select Committee on

Intelligence, said: "You either have got a defector who was allowed to just walk away under circumstances that I still can't accept and cause a significant embarrassment to the United States, or you have a double agent who was planted on the United States and then you have far more than a significant embarrassment, you have an out-and-out calamity.

"No matter what, something is wrong," he said.

Mr. Yurchenko walked into the State Department on Tuesday evening escorted by several Soviet officials. He left the building an hour later. In response to a shouted question about whether he was going home, he clasped his hands to Moscow. The degree of damage above his head like a prize fighter has not yet been fully assessed, and declared, "Yes, home."

A State Department spokesman said a doctor had seen no evidence during the meeting that Mr. Yurchenko had been drugged.

[President Ronald Reagan said Wednesday that he was perplexed by the actions of three Soviet men. including Mr. Yurchenko, who had taken refuge with U.S. officials and then changed their minds. "You

Doubts About Autonomy Amid Micronesia's Palms

Long Reliance on U.S. Has Failed to Prepare Pacific Islanders for Limited Self-Government

By Clyde Haberman

New York Times Service MOEN, Truk Islands - A few years back the Municipal Assembly banned all alcohol sales on this craggy island in the Western Pacific.

Prohibition has worked about as well as it did in the United States 60 years ago. Now people break the law to drink. Moen's police chief decided he would not even pretend to enforce the rules. His defiance so upset Mayor Fichita Bossy that

he opened his own jail for liquor violators. Unfortunately for the mayor. Truk state officials closed down his operation for sanitation-code infractions. This might be dismissed as mere comedy

were it not for the seriousness of alcohol abuse, not only in Truk but throughout the 2,000 islands in the vast Pacific chain known as Micronesia. From the highest official on down, Micronesians list drinking as one of their most debilitating social problems and the chief cause of nearly all violent crime.

Trukese say that Moen's liquor ban has cleared the streets of many drunkards prone to knife fights. But it has also created a new category of lawlessness and has basi-

sortment of young governments looking for limited political autonomy. The transition process has been arduous, often bogged down in disputes with Washington over the conditions for home rule.

that it will be at any rate a civil

But even if the wrangling vanished overnight. Micronesians agree, with little dis-sent, that long U.S. rule has failed to pre-pare them to stand on their own. It is not just that they have come to expect the U.S. aid, which is more than \$110 million a year for about 135,000 people. They are no longer able to survive without it.

Stories are similar on most of the 100 or so inhabited islands. Planned fisheries somehow never open. Copra mills open, but quickly close. Chicken-raising projects fuil because necessary feed cannot be flown in on time.

The only growth industry is politics. The only significant employers are the many national, state and municipal governments, whose budgets consume most of the U.S.

At least half the salaried workers throughout Micronesia hold government jobs, which pay far better than the relatively few private sector positions that are tranquil lagoon, much of Moen, the main available. In a sense, Micronesians say, island in the Truk group, could easily be government employment itself is a form of mistaken for the slums of New York.

"The Americans have been successful at making us politicians," said Ignacio Anas-tacio, a member of the Palauan Congress. cally failed, they say.

Some people then add as a postscript: just like so many other ideas borrowed from the United States.

Having spent the last 38 years as a U.S.

Trust Territory, Micronesia is now an ascomment of the Palauan Congress.

But in terms of giving us economic development. I would give them a big F." In most U.S. schools, F denotes failure.

On the island of Ponape, a longtime American resident agreed: "We just don't make very good colonialists."

A few people look back almost wistfully to the 30 years of Japanese domination that ended with Japan's defeat in World War II.

at least they ran thriving sugar-cane plantations and built roads.

WORLD BRIEFS

Lange Denies Deal on Agents' Fate

WELLINGTON, New Zealand (Reuters) - Prime Minister Davids, Lange insisted Wednesday that his country did not negotiate with France. over the fate of two French agents involved in sinking the Rambou

Warrior protest ship.

Mr. Lange said through a spokesman that no negotiations had been held on a political level over the trial or sentencing of Captain Dominique Prieur. 36, or Major Alain Mafart. 35. The French secret agents were arrested by the New Zealand authorities in July after an explosion sink. the ship belonging to the environmental group Greenpeace. A crew-member was killed in the blast in Auckland harbor.

Two French ministers have said there were contacts between the two countries over the fate of the French spies, who pleaded going to manslaughter and sabotage charges Monday after charges of murder were dropped. Sentencing is scheduled Nov. 22 Mr. Lange's latest rejection of the French assertion, his third since Monday, followed a statement by Roland Dumas. France's minister for foreign relations, that negotiations had taken place.

Portugal's Prime Minister Sworn In

LISBON (Reuters) — Anibal Cavaco Silva was sworn in Wednesday as prime minister, and promised that his center-right Social Democratic government would not allow Portugai to become Europe's "poor relation" after it is admitted to the European Community in January. Mr. Cavaco Silva, 46, said the poverty and underdevelopment that have plagued Portugal could not be tolerated in a country about to join

the community. "We are counting on Europe, we want it to count on us," he said. "We will not be Europe's poor relation." The Social Democrats' campaign in the October general election emphasized business confidence and growth after austerity measures. taken by the previous Socialist-led government led to a drop in invest-ment and real salaries. Marcos Will Handpick Running Mate

MANILA (AP) - President Ferdinand E. Marcos said Wednesday that he would handpick his vice presidential running mate if an election is held in January as he has proposed. He said he would call a caucus of his ruling New Society Movement on Friday to discuss election matters. Political tradition in almost all democratic countries is that the

running mate for vice president is usually the personal choice of the president," Mr. Marcos said.

Asked what criteria he would use in selecting his running mate, he said? "Prestige, strong popular appeal and, more than this, that if anything happens to the president, he will make a good, credible president." His wife, Imelda Marcos, who returned Wednesday from a trip to the United." States. Italy, the Soviet Union and Japan, denied that she had any intention of running for the vice presidency.

For the Record

The Indian state of Assam will hold elections Dec. 16. Four months ago, settlement was reached after five years of sectarian conflict that had laimed more than 4,000 lives in the northeastern state.

Hundreds of thousands of workers in the metal, chemical and plastics industries went on strike Tuesday in Saō Paulo to demand higher pay. A union spokesman said that "at least 500" factories had been closed. By Spencer Rich

Washington Part Service
WASHINGTON — Residents
of Hawaii have the highest life expectancy in the United States and esidents of Washington, D.C., the nation's capital, have the lowest, according to a report by the Na-tional Center for Health Statistics.

The study indicated that life exectancy for all U.S. population groups now is about a year more than in the 1979-81 period and four years more than in 1969-71. Alaska, Georgia, Mississippi, South Carolina and Louisiana

Derived from the 1980 federal census and from death rate statistics, the report estimates that the average life expectancy of Hawaii esidents in the years from 1979 to 1981 was 77.02 years, with men at 74.08 years and women at 80.33.

The District of Columbia trailed Pacific island origin to be the the 50 states, with an overall life healthiest in the nation, possibly expectancy of 69.20 years, 64.55 because they eat and drink less years for men and 73.70 for womthan others.

The figures, released Tuesday. were the latest available for individual states and represent the number of years the average infant would live if the death rates prevailing during the period from 1979

Claim Victories at Polls "The interesting thing about Virginia is that you had a Democratic ticket running as far away from the national Democratic Party as they By Phil Gailey New York Times Service NEW YORK - The two major could run. It's a warning to us as we prepare for the 1986 elections that

Both Major U.S. Parties

U.S. political parties divided the spoils from Tuesday's two gubernatorial elections, and each party

claimed a major victory with national implications. In a historic sweep in Virginia, Democrats won the governorship and elected their nominee as lieutenant governor, the first black to win a major state office in the South since Reconstruction.

Voters in the state once considered a Republican stronghold also elected a Democrat, a woman, as

Meanwhile, Republicans called Governor Thomas H. Kean's lopsided re-election victory in New Jersey a major step forward for the party's effort to broaden its base. Mr. Kean, benefiting from bipartisan support and his state's economic resurgence, defeated his Democratic challenger, Peter Shapiro, by nearly a 3-to-1 margin.

The two statewide contests were being watched by both parties for the first signs of political movement since President Ronald Reagan's landslide re-election a year

In Washington, Republican Par-officials hailed the New Jersey results as evidence of continuing political realignment. And Democrats called the Virginia outcome evidence of the party's potential to regain its strength, particularly in the Southern states where Republicans have scored some major gains in public support under Mr. Rea-

gan's presidency. Virginia voters elected Gerald L. Baliles as the second Democratic governor since 1965. Mr. Baliles defeated his Republican opponent, Wyatt B. Durrette, by a comfortable margin. Mary Sue Terry, a Democrat, easily defeated William R. O'Brien, a Republican, in the

race for attorney general.

In the contest for lieutenant governor, a Democrat, L. Douglas Wilder, who is the grandson of a slave, defeated John Chichester, a

Paul G. Kirk Jr., the chairman of

the Democratic National Committee, issued a statement heralding the "Democratic sweep" in Virgin-

"The unified Virginia ticket proved that diversity within the Democratic Party can once again be a strength," Mr. Kirk's state-ment said. The Virginia race, he added, "makes it clear that when Democrats address common interests, mainstream concerns of the average American without regard

to race or gender, we win."
Frank J. Fahrenkopf Jr., the chairman of the Republican National Committee, said the election results in both New Jersey and Virginia "means that realignment con-

He explained: "The fact that Tom Kean and the party are running so strongly is a continuation of what we saw in last year's presidential election — a strong Republican candidate cracking Democratic voting groups."

In Virginia, Mr. Fahrenkopf said. "We allowed the Democrats to out-Republican us." He added: Full winter collection

Craxi Returns Stronger

Bettino Craxi, having survived a three-week government crisis, is back in office and on his way to becoming the longest-serving prime minister in postwar Italy. Later this month he will beat the record of two years and three months in office set by the late Aldo Moro, a Christian Democrat.

Beyond Mr. Craxi's personal triumph, and beyond the Byzantine maneuvering of the parties and the oratory in Parliament. several important political facts emerge from the crisis that wasn't.

Some of the policies over which Defense Minister Giovanni Spadolini and his Republican colleagues provoked Mr. Craxi's now revoked resignation have been reinforced instead of watered down. This is true above all of Italy's Middle East policy.

A Mediterranean country with major economic, political and security interests in the Arab world, Italy had long been conducting Middle East policies that differed sharply from those of America. Although Mr. Craxi and his Christian Democratic foreign minister, Giulio Andreotti, carried the pro-Arab, pro-Palestinian tilt further than their predecessors, these policies had remained a matter of "pragmatism" and even expediency, and were never elevated to the status of a national strategy. This, though, is what they became when the prime minister reiterated them without major change in his speech to the Chamber of Deputies on Monday and made them part of the platform for future action by the five-party coalition.

In addition, Mr. Craxi, one of Italy's most "pro-NATO" and "pro-American" politicians, has been able to drape himself in the mantle of an Italian superpatriot for stand-

frontation between American and Italian troops at the NATO base of Sigonella. In his statement in the Chamber he declared that a NATO base on Italian soil must never again be misused as he feels Sigonella was by the United States after the Achille Lauro hijacking. Italian politicians in power do not often use such terms in speaking of the alliance.

How long will Mr. Craxi's new strength last? His next task is to get the 1986 budget through Parliament, if possible before the end of the year. The aborted government crisis has cost him valuable time. All five parties in his coalition are on record as opposing inflation and favoring a reduction of the huge state deficit, but there is no real consensus about the tough economic measures that are actually required.

The Communists, who had fought Mr. Craxi tooth and nail ever since he came to power, praised him for his stand during the Achille Lauro affair. But whether they will heed the appeal that he made in the Chamber on Monday for a moderate approach to the budget debate remains to be seen. They can obstruct the economic debate in the country even though they cannot bring the government down in Parliament.

If Prime Minister Craxi has been allowed to stay in office with unchanged policies and an unchanged cabinet, it is because no party in the coalition was prepared for the only possible alternative - early national elections. It is also because the Christian Democrats, who remain the most powerful party, are not yet ready to move back into the prime minister's office themselves.

INTERNATIONAL HERALD TRIBUNE.

More Substance, Please

Russians let Andrei Sakharov telephone his family for the first time in six years and they offer to let his wife travel to the West. They have published an interview with an American president for the first time in 24 years. These manipulations obviously are meant to make the Soviet Union look less repressive and to make its policies look more reasonable.

It is a shame that in his first chance to explain "star wars" directly to Soviet readers, President Reagan failed to get his own arms control vision straight. And it is a shame that the Russians lacked the courtesy and courage to print his answers without censorship. That it takes a summit meeting to produce even these flawed attempts at communication shows the gulf that diplomacy must bridge.

The most important feature of Mr. Reagan's Izvestia interview is that it occurred. Obviously Moscow has felt stung by American com-plaints that Mr. Gorbachev takes unfair advantage of American media without offering reciprocal access, that abuse of dissidents makes Americans skeptical of Soviet intentions and that Soviet violations of arms control agreements make new ones less appealing.

With their recent gestures, the Soviet leaders seek either to improve the climate for the summit or to avert blame for its failure. This defensiveness is all to the good and can lead to larger gains if the Reagan-Gorbachev encounter ends with an agreement to meet again next more significant changes of Soviet policy in Afghanistan, Cambodia or the Middle East.

The Russian censors worked hard to excise almost all of Mr. Reagan's blunter criticism of

The Reagan-Gorbachev meeting approach- Soviet conduct and also the president's effort es and summit seductions are upon us. The to demonstrate his own humanity. They would not let their people hear him deplore the fact that "both of us could threaten the other with the death and the annihilation of millions and millions of each other's people." They left only his colder explanations of the Strategic Defense Initiative, buttressing the Soviet charge

that he is sponsoring a new arms race in space. On this central point, the president compounded his administration's already great confusion by saying that he would deploy "star wars" defenses only after offensive nuclear weapons are negotiated out of existence to guard against some madman elsewhere. The White House quickly corrected him, saying that he also envisioned a "transition" period of both defensive and offensive arms.

The truth is that no total defense is conceivable in this century and the administration now aims mainly to augment the deterrence of offensive weapons with a missile defense. If both sides had such defense, they would be rushing to expand rather than reduce offensive weapons. So if reductions in offense are to be negotiated now, both sides will have to amend the anti-missile treaty, distinguishing more clearly between "tests" and "deployment" and extending the required cancellation notice from six months to at least five years.

The coming summit can point toward such an accord and still let Mr. Reagan claim that research on defense will continue while Mr. year. As Mr. Reagan emphasized in his inter-view, the relationship could also benefit from warhead stockpiles. Better questions from Izvestia would have focused on that possibility. Clearer answers by Mr. Reagan would have

shown that the possibility survives. - THE NEW YORK TIMES.

Other Opinion

A Strong Mandate for Alfonsin

Sunday's elections in Argentina were a resounding vote of confidence for President Raul Alfonsin. He can dig in on the next phases of his programs knowing that his effort to create economic and political stability still commands the support of most Argentines.

Nearly complete voting returns indicate that Mr. Alfonsin's Radical Party won more than 44 percent of the vote, compared to 35 percent for the Peronists. That would give the Radicals an even larger majority in the 254-seat House of Deputies against the Peronists, who are badly divided into squabbling factions.

In the final weeks of campaigning there was concern over a possible resurgence of the political violence that has marred recent Argentine history. A series of bombings and bomb threats disrupted life enough to prompt Mr.

Alfonsin, as staunch a democrat as can be found in Latin America, to impose a state of siege throughout the country. The government believes that the bombings were part of a right-wing plot to provoke the military into a coup.

States of siege are used in Latin America to control political dissent when it spills over into anti-government violence. Too often they have also been abused by limiting peaceful and legitimate criticism. To Mr. Alfonsin's credit, his government used the state of siege only to detain a dozen suspects in the bomb plots. Otherwise electoral activity proceeded unhindered. It should now be clear, however, that the state of siege was unnecessary and must be lifted as soon as possible. The vote count is a clear sign that he does not need extraordinary measures to protect his government. He has the support of the people.

FROM OUR NOV. 7 PAGES, 75 AND 50 YEARS AGO

1910: Dog Demands Another Term WASHINGTON - Pete, the almost forgotten Roosevelt man-eating bulldog that gained no-toriety by chasing M. Jusserand, the French Ambassador, from the White House grounds, has turned up unexpectedly in his old haunts after two years of "roughing it" and made things hum. After causing a panic in the State, War and Navy Building and nearly taking a leg off several employés who tried to turn him into the street, he retired to the cellar of the Taft White House Last reports are that Pete is reposing quietly somewhere about the White House, docile as a lamb, having found a friend of other days in one of the attendants. Since the last administration Pete has been having a hard time. When he returned he found himself

discredited and most of his old friends gone.

1935: Hitler Gives Olympics Pledge

BERLIN - Comte Baillet-Latour, president of the International Olympic Committee, said that Adolf Hitler assured him [on Nov. 5] that the Olympic Games of 1936 should be handled "harmoniously, in the spirit of the Olympic idea," and not be disturbed by any political consideration. Admitting that in 1933, when Hitler came to power, the Committee faced a situation which rendered doubtful the advisability to have the games in Berlin, the Count said that he and his friends soon convinced themselves of the German government's good will to have the competitions carried out in a fair spirit. "The Committee did not ignore the boycott movement directed against having the Games in Berlin," he said. "But this movement was recognized as purely political.

WASHINGTON — Visitors to Moscow say a current theme there is that President Reagan is a manipulated cipher within his own government. Some members of Mr. Reagan's government probably think so, too, and hope to prove the point by stuffing their agenda into any communiqué issued jointly by the two sides at the conclusion of the summit.

A communique is utterly optional and obvi-ously unwise. There was none at the conclusion of last month's Gorbachev-Mitterrand summit. President François Mitterrand of France successfully avoided having an "arms control sum-

mit." He constantly raised issues of human rights, including lists of specific cases. This moral tone and concreteness prevented the antiseptic and anesthetizing arcana of arms control from producing numbness, that absence of feeling that U.S. diplomats confuse with "good feeling." Mr. Mitterrand knows that communiques is-

sued jointly by democratic and totalitarian leaders must be vapid, to the totalitarians' advantage. They are tissues of muzzy formulations falsely

suggesting harmony and moral symmetry.
No summit is short enough, but all summits are short. Divide the available time (in Geneva, two days) in half to allow for meticulous translations. Then subtract time for stilted niceties. Obviously, summits must be primarily ratifying occasions, unveiling work done elsewhere. Now By George F. Will

imagine the draining and flattening of language being done today by U.S. diplomats toiling to reinvent détente in a concluding communique designed to eviscerate Reaganism. Diplomatic boilerplate often proves that even

the platitudinous can be injurious. If a joint communique asserts, contrary to reason and history, that tensions yield only to dialogue, it trivializes this century's great division between freedom and its armed enemies. What is needed is not more dialogue but less Soviet misbehavior. Larry Speakes, reflecting an inanity loose in the administration, says that Mr. Reagan's first job is to convince the Soviets that "we don't plan to run over them." Oh? Does Soviet aggress flow from insecurity, which U.S. policy has caused and now must assuage?

Add to that loopy idea the State Department idea that "frictionless" is a synonym for "good" in the phrase "good U.S.-Soviet relations." Then add Mr. Reagan's craving for a "fresh start" in relations. Stir well and you will get a communi que designed to blur edges, bleach colors and put both sides on the same moral footing.

This is a recipe for diplomatic junk food, for mental cholesterol that clogs intellectual arteries with absurd notions, jointly affirmed, such as:

is rubbish, and if Mr. Reagan returns to Washington having endorsed rubbish, he will have negated his recent United Nations speech in which he denounced "numerous" Soviet violations of "all" agreements of the 1970s. He will also have repealed his five-year record of objec-tions to Soviet violations of arms agreements and

the Helsinki accords concerning human rights.

Speaking of human rights, the Soviets may soon perfume the Geneva atmosphere by settling a trivial number of human rights cases. So imag-ine a joint communique pledging both sides, as moral equals, to work to resolve human rights problems without "interfering" in the "internal affairs" of one another. That would mean that the Helsinki accords on human rights do not apply to the internal affairs of any country. They

protect human rights in ... Antarctica? Were Mr. Reagan to leave Geneva enveloped in a cloud of such verbiage, he would demoralize those who for 20 years have taken his quite different words seriously. And he would be disdained by those who would have successfully manipulated him. Such Geneva words would retroactively discount his public life, and would confirm Moscow's current theme. Joint communiques generate myths of moral equivalence. In Geneva, Reaganism requires reticence.

rich. It has encouraged the flashing of money in diamonds, furs and stretch limos. And it promotes the rubbing of shoulders with the Prince and Princess of Wales at social galas. The principal beneficiaries of these events are the new rich who have not

established social prestige. They walk with kings and shake off the common touch. They dance with dukes and duchesses. They are rolled together with the best American families. And they do not even have to learn a foreign tongue or bridge a cultural gap. It is enough to pay the piper. No great harm can come of this. but small wrongs are perpetuated.

The bogus "special relationship" goes on. Britain continues to become less and less weighty in the world. It does nothing to renew its work ethic or compose class differences. It sells its prestige to the highest bidders.
America keeps picking up commitments dropped by Britain on a piece

by piece basis, but without organizing a coherent strategy that commands enduring support at home. It fails to develop a responsible estab-lishment that combines wealth with a taste for governing. On the contrary, having failed to fuse wealth and responsibility in their own country, Americans borrow prestige from an

suistocracy they can buy.

So the "special relationship" consists of living off the aristocracy of Britain. In that sense the Anglo-American tragedy has become a farce. Nobody should be altogether happy that the farce goes on.

Tell Marcos Bases Are Expendable: By George McT. Kahin

ITHACA New York - Americans concerned about the Philippins in Press might have been reassured by President Ferdinand Marcos's indication that a presidential election may be held early in 1986. But that deep nothing to mitigate the foolishness of Washington's recent dension to in-crease investment in the U.S. military

bases at Clark Field and Subic Bay That decision — to spend \$1.5 billion to upgrade the bases and retain them until at least 1991 — #45 and an account of the spend of the nounced last month, just days before Senator Paul Laxah traveled to Mamile to urge reforms on the Marcus government. It thus mevitably under-cut Senator Laxalt's efforts. It also surely discourages the non-Communist opposition that plans to chal-lenge Mr. Marcos at the polls.

Whatever Washington can do to encourage change in the Philippines

and that capacity is severely limited — it is certainly futile to attempt to do so with one hand while doggedly holding on to the bases with the other. Thus, congressional unkering with the relative size of the military and economic components of the rental America pays can have only a

marginal political effect.

The value and durability of the American facilities are diminishing even as the Pentagon prepares 'f' First, the bases and the nuclear

weapons understood to be stored at them are now within the range of Siberian-based SS-20 missiles. Second, the overall center of gravity of U.S. naval and air missions has shifted westward from the South China Sea toward the Indian Ocean and the Middle East. A 7th Fleet carrier force has been moved to permanent station in the Indian Ocean, where major facilities capable of handling

B-52s have just been completed on the island of Diego Garcia. Third, the Pentagon's assertion that Philippine bases are vital be-cause of Soviet access to Danang and Cam Ranh Bay, in Vietnam, rings hollow. For Mr. Marcos has pledged Hanoi that he will not permit the United States to use Clark or Subic to

mount an attack on Indochina. The value of the bases is also being seriously undercut by the continuing erosion of the political ground on which they stand. Both Mr. Marcos and his opponents - Communist and non-Communist - exploit up predictable currents of Philippine aztionalism. Of most immediate danger is the Communist-led New People's Army, which, Defense Minister Juan Ponce Enrile told me, now musters some 18,000 armed men, balf of them

with modern American weapons. U.S. commanders emphasized to me that their major worry is security on the permeter of the bases. The New People's Army lacks the power to overrun the facilities, but it has the capacity to harass them extensively and to render them largely inoperative. Only two months ago a guernila unit walked right through the Philippine military's outer perimeter at Su-hic Bay and camped close to the border of the U.S. facility, within mortar Only 600 Filipino troops are available to patrol Subic's outer perimeter, which is more than 20 miles

(more than 32 kilometers) long. in such a situation, guerrilla lead-ers could easily be tempted to exploit nationalist feelings through a con-troutation with a manufacture. frontation with American troops.

Nor is it implausible that an American base commander might react impulsively to a perceived guerrilla threat. The bases agreement grants these commanders the unqualified right to carry out security measures outside the bases, with no stipulation about the circumstances or how far American lorces can be sent. Given the record, what should one expect President Reagan's reaction to be if shots were fired at American servicemen? So there is a real possibility that the United States could be drawn into a quagmire in the Philippines.

Clark and Subic clearly rest or uncertain political sand, and little time is left for the Pentagon to implement contingency plans for moving and decentralizing the military assets now dangerously concentrated there. Ample alternatives exist — among them Guam, Tinian, Saipan, Palau. For the time being, at least, much greater use could be made of bases now available in Australia and Singapore. The Pentagon should begin this shift now, using the funds it has so imprudently allocated for further investment in Clark and Subic.

The writer, professor of international relations at Cornell University, visited the Philippines in September to study the U.S. bases. He contributed this comment to The New York Times.

Los Angeles Times Syndicate.

LETTERS TO THE EDITOR A Meeting of Opposites

President Reagan's proposal that the superpowers share research in strategic defense is a morally bold idea, putting ethical principles before ideological conflict. However, at the summit Mr. Reagan will be meeting the leader of a system that represents a backward step in the moral pro-gress of mankind. In their "Joint Appeal to Reagan and Gorbacher" (Oct.
31), Olof Palme, Rajiv Gandhi et al use moral arguments unlikely to have 31), Olof Paine, regive use moral arguments unlikely to have use moral arguments unlikely to have use moral arguments unlikely to have one, designed to use economic, political and his establishment. Until Moscow cal and unlikely pressure to force internal reform in the Soviet Union and be naive to pin high hopes on a meeting between two leaders who, morally, have so little in common.

U.S. Tempers Its Hopes For Accords in Geneva

REYKJAVIK — After intensive talks in Moscow, U.S. officials ac-knowledged Wednesday that only expected from the summit meeting ween President Ronald Reagan and Mikhail S. Gorbachev.

But the officials appeared outwardly calm when faced with the prospect that the public might as-sess the summit meeting, now less than two weeks away, as a failure.

A senior official who accompanied Secretary of State George P. Shultz to Moscow for two days of talks said that it would be a "false standard" to judge the summit meeting on what was signed there. The Soviet leadership, he argued, is undergoing historic changes and has been focusing on internal af-

Under a proposed public order bill, rioters would face up to 10 years in prison, with sentences of up to five years and three veils for the related offenses of violent dis-

order and brawling.

There would be a new offense of disorderly conduct that the police could use to control hooliganism. The government also proposes to tighten existing laws against incitement to racial harred. There would be a new offense of possessing ra-

cially inflammatory material with a

view to publication or distribution.

SCIENCE

Building Lessons Emerge From Mexico City Quake

By William Stockton New York Times Service

MEXICO CITY — The earthquake that killed an estimated 7,000 people here in September

MEXICO CITY — The earthings placed too close to each other.
The geology of Mexico, the name of the most striking finding about the manual of the manual

building design and city planning. Although earthquakes register-ing 8 or more on the Richter scale have struck a few other major metropolitan centers in this century. the Mexico City disaster was the first to test the building technology widely used in major cities.

Among the conclusions drawn from the disaster, which destroyed more than 400 buildings and damaged hundreds more, are that architects, engineers and city planners must restudy geological formations beneath some cities that might greatly increase the destructive force of an earthquake.

lower floors, with denser conditions on the floors above, caused withstand an earthquake of 6.0.

SAUDI ARABIA

The Ministry of Planning of the Kingdom of Saudi

Arabia has the following openings for qualified

Water Resources Development Planner Physical Infrastructure Planner

MINIMUM REQUIREMENTS: All candidates should have doc-

toral degree in related fields with five years or more direct

professioanal experience, or master degree with ten years

experience. Preferences are given to candidates who are estab-

lished professionals, with national level planning and govern-

ment service experience, particularly in developing countries or

CONDITIONS OF SERVICES: The successful candidates will be

located in Riyadh. Salary depends on qualifications and experi-

ence. Others benefits include housing, education and mainte-

nance allowances, free use of a car or transportation allowance

paid leave of 45 days a year, and economy class return tickets

Interested candidates should send detailed resume with

salary history, expectations, names of references, and

quake and Mexico's emergence as a major population center produced the Sept. 19 disaster.

are more land for building.

Mexico City became an urban center of 18 million people. Much of it is built on the high ground surrounding the old lake bed, but parts of the city center were built on layers of sediment with high water content, more than one and a

Dozens of smaller ruptures occurred afterwards as the plate re-

quencies. Some waves come every few hundredths of a second, others at intervals of one-tenth of a second, still others at longer intervals. Instruments near the earthquake's epicenter recorded similar waves. But when the waves reached Mexico City two minutes later, the high frequency waves had been filtered out by the 300 miles of terrain in between. What remained was a train of seismic waves of great in-

There was little damage in the hills around the old lake bed, where

was different. The long, intense

The reason is that buildings have natural vibration frequencies. For example, if you grasp a credit card at one end, hold it upright and tap the free end of the card, it will vibrate briefly, then the vibrations will die out. The vibrations disappear because of the friction of the molecules of plastic in the card rub-

Struck once, the building's vibrations will quickly die out, since the energy that caused the vibrations is absorbed within the building. Friction between the molecules of iron in the building's steel beams, for example, absorbs energy. So do the concrete, the iron bars inside the such a building is pushed sideways, reached the old lake bed in the concrete and the building's other the building will sway, taking two Valley of Mexico, the layers of

BELJING (AP) - A study of China's centenarians Of special concern were streethas determined common longevity factors: a low-fat, high-fiber diet and a moderate climate in mountainous corner buildings with soaring lob-bies, and hotels and office buildareas, a press report said.

Most of the 3,765 centenarians discovered in the 1982 national census live in remote, ethnic regions ings with parking garages or large open spaces on the lower levels. As the shaking continued, columns in 1982 national census live in remote, einnic regions such as Tibet and Xinjiang, the People's Daily said.

Two doctors from Hubei province told a symposium in Nanning recently that 70.5 percent of the centenarians are women. Their study found that most have a low-fat, low-animal protein, high-fiber diet, the open lobby areas failed. The upper floors of the buildings, filled with offices or hotel rooms and less flexible, increased stress on the lower floors. The tremors also imin England. Last year, while almost 10,000 Americans underwent regular dialysis while waiting for transplants, at least 300 kidneys collected in the United mainly obtained from carbohydrates," the report said.

Vertical concrete columns often failed because they were not built strongly enough. The continued shaking caused the columns to batter the concrete slab floors they supported. A common sight in the carthquake damage zone is buildings whose concrete columns failed, bringing the floor slabs down on top of one another like a

Chinese Find Fossil Primate

BELIING (AFP) — Chinese experts have discovered rare fossils of what may be a forerunner of man, a

giant ape up to 10 million years old, the Xinhua news

The fossils, found last month in Sichuan province,

belong to a species of Gigantopithecus, a giant primate from the Pleistocene era and belonging to an interme-

diate state of development between the great apes and

primitive man, the agency said. The discovery in a cave 2,640 feet (800 meters) above sea level also

included fossils from 20 species of mammals and reptiles dating up to 65 milion years ago, such as mastodons and sabre-toothed tigers.

The scientists who made the discovery said that it would help the study of Chinese paleontology, of the geological history of the upper reaches of the Yangtse river and of the formation of the Yangtse gorges.

Sale of Kidneys Is Abused

PITTSBURGH (AP) — Kidneys for transplants are in such great demand that some have been sold for up to \$13,000, or more than seven times their weight in

gold, according to a 10-month investigation by The

The newspaper found that money often determines the 5-ounce (140-gram) organ's path from donor to recipient. And money is an incentive to donors in such countries as India to put their kidneys up for sale.

"When you have commodities that could be life-

saving or prevent you from being crippled or blinded

and they are scarce, you immediately face the law of

the marketplace degenerating into the law of the jungle, said Dr. Roy Calne, a pioneer in kidney transplantation, who works at Cambridge University in England. Last year, while almost 10,000 Americans

THE WORLD HEALTH ORGANIZATION

invites applications for the post of

MEDICAL OFFICER IN THE PARASITIC DISEASES PROGRAMME which will become vacant in August 1986

Duties: Under the supervision of the Director, Parasitic Diseases Programm arcumbent will be responsible for the implementation and future development of the WHO programme for human intestinal parasitic infections, both protozoon and heliminities. This will involve international coordination and cooperation with WHO Regional Offices and national health services to stimulate programmes of intestinal heliminitiasis control using a Primary Health Caris approach. The incumbent will be responsible for professional and technical training in the diagnoss, epidemology, chemotherapy and control of intestinal parasitic infections and will be expected to continue the present active programme of teaching courses at country and interregional level. The incumbent will provide specialist advice to other branches of WHO and will liase with other programmes with strates interests, particularly the Dicarhoeal Diseases Control programmes. The administration of research grants and the updating of epidemological information are essential parts of the programme. recombent will be responsible for the molementation and future development of the

Qualifications: Medical degree from a recognized University. A post-graduate degree or equivalent in trapical mediane or public health would be an asset. At least five years' experience in the design and administration of research and control programmes on parastic diseases. Trapical field and laboratory experience in research and control of intestinal parastic infections would be highly desirable. Excellent knowledge of English or French with a good working knowledge of the other.

The solary scale ranges from USSS1,746 (single) and from USSS6,035 (with dependents)

Applications are invited from condidates of either sex - applications from women are encouraged. Qualified condidates should send their detailed curriculum vitce not later than 28 February 1986 qualing PDP/86 to:

Personnel (MPR) World Health Organization CH-1211 Geneva 27

Only those condidates under serious consideration will be contacted.

SUPPLY AND TRANSPORT OFFICER

United Nations Agency operating in the Middle East seeks Supply and Transport Officers for its Field Offices in Amman (Jordan) and Gaza.

Condidates may also be considered for similar positions expected to be vacant elsewhere (Damascus and Jerusalem) in the Agency's area of operations during 1986.

Applicants should have University degree in business adrelated field and additional course work or training in supply and transpor management. Excellent command of spoken and written English is essential. tive experience, preferably at international level, is required in supply and transport management including purchasing, supply planning, ware-housing, stock accounting and transport fleet responsibilities. Arabic know-ledge would be desirable.

Incumbent will supervise operation and maintenance of transport fleet and the procurement, receipt, storage, issue and distribution of supplies and equipment required to provide services to large refugee population.
Salary and allowances range from U.S. \$35,000 (single) and from U.S. \$38,000 (with dependents) tax free per annum, plus fringe benefits. Qualified candidates should send detailed curriculum vitoe and photograph as soon as possible quoting reference VN/12/85 (A) to:

Head, Staffing and Training Office UNRWA Headquarters Vienna International Center P.O. Box 700 A-1400 Vienna, Austria.

PERSONNEL WANTED

Men's collection

Ties: back to heavy silk

There is no possible doubt about it: heavy silk is back in fashion for ties. Lanvin has a whole collection of them, specially woven on period looms. The result is an extraordinary variety of rich fabrics, in colour combinations such as you have never seen before, with designs of astonishing relief.

Then there are the famous "Lancin Specials", which are also woven on period craft looms. It takes nearly a square metre of silk to make only three of these!

But here are only a few suggestions; with eight thousand ties in stock, Lanvin offers the widest choice you could possibly want.

Capital Gains: **Guidelines** For Foreign **Purchasers**

By Robert C. Siner

WASHINGTON — Foreign investors in U.S. real property are now subject to a federal withholding tax on any gains realized when

ar withnothing tax on any gains realized when they sell that property.

Amendments to the Foreign Investment in Real Property Tax Act (FIRPTA) provided that, as of Jan. 1, 1985, gains from any sale of a U.S. real property interest by a nonresident foreign individual, partnership or corporation would be subject to withholding of either 10 percent of the selling price or the seller's maximum tax liability, whichever is less. This is withheld from the payment by the purchaser at the time of sale.

The actual tax liability will be 20 percent of

the gross gain.

Exemptions from the withholding tax are • If there is an IRS-approved agreement

covering payment or exemption. • For sales of real property for \$300,000 or less that the purchaser will use as his resi-dence. This property must include an existing

dwelling. Property without a dwelling is sub-ject to withholding even if the purchaser's residence is eventually built there.

• For sales of publicly traded stock. • For sales of nonpublicly traded stock where an affidavit has been submitted that the corporation is not a U.S. real-propertyholding corporation.

Under the terms of the act, real property is defined as an interest in real estate, buildings, other permanent structures, structural composterts of buildings, equipment used in farming, forestry or mining, equipment used to improve real property, furniture used in lodging facilities and property used to fornish office space. Interests in real property include direct ownership and ownership of stock in a nonpublicly traded corporation holding U.S. real property.

Before passage of FIRPTA in 1980, nonresident foreign investors in U.S. real estate were not subject to capital-gains taxes on real estate unless they were "engaged in trade or business in the United States" or the gains were "effectively connected," with that business. Resident aliens and those foreign investors deemed to be engaged in a U.S. trade or business paid regular U.S. taxes. The rule for resident aliens and foreigners engaged in U.S. business remains unchanged.

Foreign investors not engaged in U.S. business may elect to be taxed as though they were. To take this option, the investor must file a statement to this effect with the tax will take effect. This can be of advantage because real estate income, such as rent, will then be taxed on a net basis. This means that the foreign investor can claim deductions for depreciation, interest payments and operating expenses and be taxed on a progressive scale. The real estate income of foreign investors not engaged in U.S. business is taxed on (Continued on Next Page)

Blessing of the hounds at Derby Meadows, Manassas, Virginia.

High Stakes in the Hunt Country

By Ann Mariano

MIDDLEBURG, Virginia - Here among the undulating green fulls and pastures of north-ern Virginia, where even the teddy bears in a village shop wear fox-hunting garb. luxurious, fairy-tale estates are the rule and the inhabitants are the wealthy and powerful:

Standard features on the sprawling properties are stables, barns and riding rings, since for hunting, racing and breeding horses are passions with many who live here and many who come looking for estates to buy or rent.

The Orange County Hunt, named for Orange County, New York, where it began, takes place in this area and is considered by some to be one of the world's most exclusive hunts.

In tiny Middleburg, fashionable center of the 1,100 square miles (2,840 square kilometers) in

Fauquier and Loudonn countres that make up the bunt country, the rich landowners mingle, often unnoticed, with crowds of tourists.

Visitors have included Queen Elizabeth and Prince Philip, who had lunch with Paul Mellon, one of the world's richest men, on his 1,000-acre (405-hectare) estate at Little Oak Springs. American presidents since George Washington have visited or lived here for short periods. John F. Kennedy first rented a country home and later built his own, naming it Wexford:

Nancy and Ronald Reagan rented Wexford, which the Kennedys no longer own, for two months during the 1980 presidential campaign. Jack Kent Cooke, the owner of the Washington Redskins football team and New York's elegant old Chrysler Building, has a home here, as do retired U.S. Ambassadors W. Averell Harriman and George C. McGhee, Other Washngton personalities with estates include Senator John W. Warner, Republican of Virginia, and Katharine Graham, publisher of The Washing-

The hunt country, a term longtime residents scornfully say was made up by a real estate agent but one that has stuck nevertheless, is an bour's drive from Washington. It is even nearer Dulles International Airport, an important con-

sideration for jet-setters and corporate execu-

tives who travel around the world for business more expensive - \$3.5 million. Its sprawling.

Several elegant and historic estates are on the market now. Forrest Edward Mars Ir., a reclusive millionaire whose \$385-million fortune large barns, with a total of 74 stalls, and its carned a place for him on the Forbes magazine bluegrass pastures have produced 35 winning list of America's 400 wealthiest people, wants to sell Marland, his 217-acre estate.

Long Branch, a historic mansion on property purchased by a Virginia pioneer from Lord Fairfax in 1730, is for sale. Big Spring Farm, a 483-acre estate with a mile of frontage on the Potomac River, and Newstead Farm, which has a manor house built in the 1800s, are available.

Marland, priced at \$3 million, has an 8.630square-foot (799-square-meter) manor house built in 1933. It contains 10 rooms, plus a servant's wing, dressing rooms, an attic with a sauna and a basement with a wine cellar. The property is equipped with a swimming pool. kennels and eight tenant houses for estate employees, as well as barns and other facilities for

The estate commands a "spectacular" view of Virginia's Blue Ridge Mountains, said Phillip S. homas, a Middleburg real estate broker.

The fox-hunting country has a long history, and Long Branch, named for a spring-fed stream that runs through the estate, is one of its must famous properties. The three-story brick mansion was designed by Benjamin H. Latrobe, who also helped design the U.S. Capitol and the White House. One well-known feature of the house is a stairway that spirals from the large entrance hall to the top floor.

Like most estates in the hunt country, the 142-acre Long Branch property is equipped with barns and stables. Nearly all the land is in pasture, purtured by the limestone that sweeten the bluegrass, making the area one of the finest in the world for breeding horses. The price is annual property taxes come to \$2.414.

Big Spring Farm, priced at \$2.58 million, has horse and cattle facilities, a tennis court, swimming pool and a 3,000-square-foot, frame-and-

stone house built in the 1940s. Newstead Farm is higger, with 514 acres, a

The Marland estate, left; Long Branch, above, and the classic entry hall at

race horses, according to Mr. Thomas. The 1984 property tax assessment was \$11,447. In a lower price range, \$1.5 million will buy Chilton, a 67-acre estate with a 15-room fieldstone house, swimming pool and horse facilities.

not old by the standards of the hunt country. where many of the old manor nouses date from the 1800s, said Stuart Knower, a real estate Hollywood celebrities. Fred Asiare often visited his sister's estate and Erro. Flynn went on fox and estates.

For years, the hunt country has attracted hunts here. From the newer generation of stars, Robert Davall bought Butcher's Run, a small estate, earlier this year, and Sylvester Stallone, star of the "Rambo" films, is reported to be looking for a house in the area.

The late television personality Arthur Godfrey commuted for 30 years from his New York Rudolf Nurevey, who owns and rents out a 415office and apartment to Beacon Hill, a 1,967- acre estate with a brick house and other buildacre farm near the Loudoun County town of ings. The rental fee was not revealed.

Leesburg, A Saudi Arabian prince bought the farm in 1977. His attorney said at the time that the prince would keep the farm intact.

Two months ago, a group of real estate developers and investors, including former Secretary The house, which was built after World War I, is of State Alexander M. Haig Jr., signed a purchase contract for the property and revealed plans to build between 400 and 500 luxury homes on it, plus a health club and a private golf

The announcement dismayed local residents,

Some estates are available for rental, at rates ranging from \$2,000 to \$5,000 a month for the houses. Mr. Knower said. The land usually is rented for a much lower figure, typically around \$25 per acre annually.

European Designers: America's Latest Love Affair

By Jean Bond Rafferty

NEW YORK - New York has always been a melting pot of inter-national lifestyles, but the recent wave of distinctly upper-crust immigrants - more Park Avenue than Ellis Island — has put a new veneer of sophistication on American interior design.

"Europeans, used to living in grand luxe in Europe, have grown up with beautiful objects and have a better understanding of them," said Wendy Moonan, the design editor of Town and Country.

"They lean towards French fur-niture, Italian gilded commodes and even Venetian painted furni-ture. They're not afraid of whimsy. They possess more paintings, more Chinese porcelain. Aubusson carpets, needlepoint cushions and silver epergnes. The Europeans are not afraid to show it all off. The key word is opulence." she said.

Two styles seem to be competing for supremacy in the brown-stone belt: English country house and the Style Rothschild. Both ascribe to the anti-minimalist, more is more fun, school.

At the same time, there is an increasing interest in contemporary European designers. Although "chintz, ruffles and bows, comfort-these trends seem contradictory, able and cozy and very, very popu-real thing. "The light and climate in

they are explained by the fact that lar" with both Americans and for-Americans have never been afraid eigners. New York are very different to En-gland," she noted. "When you're to be eclectic. The living room may be a paean to the 19th century, but the kitchen and bathrooms are usually firmly modern.

And in a country where virtually all decoration is done by professionals, what better demonstrates the genius of an artistic eye than the harmonious marriage of two distinct periods, the contemporary

"One of the basic differences in decorating here is that 90 percent of Americans have nothing to start with said Vincent Fourcade, a French-born decorator. His interpretations of Napoleon III decors instigated the fashion for the florid opulence of the Saile Rothschild.

The reason I use so many printed fabrics on the walls is that I hate modern pictures," said Mr. Four-cade. He said that now that French furniture prices are probibitively expensive, 19th-century Russian furniture is in. "Its pale woods and slightly different shapes make it very exotic." he said.

Mario Buatta, an American decorator and a premier exponent of the English look, described it as

He attributed its success to the influence of England's Colefax and Fowler and the late Laura Ashley. "Europeans have lived in their

houses for seven or eight genera-tions and have a lot of furniture left over," Mr. Buatta said. "Americans move house seven or eight times in one lifetime and each time they start afresh. When Americans make their fortunes, they don't want to show that they were ever poor. They start contemporary, but move towards traditional when they discover that is how the estab-

lishment lives.' The decorator Anne Eisenhower, who says her style ranges from high-tech to Georgian design, has a considerable foreign clientele, in-cluding Japanese, Indians, Span-

iards and South Americans. She finds less difference in taste than in patience between her foreign and American clients. "Americans are willing to wait nine months for a carpet," she said, "but asking foreigners to wait four months for wallpaper from Italy is asking the world."

Nina Campbell, an English decorator, said that Americans really fainting with heat half the year, you won't want woolly fabrics on the

She called curtains the linchpin of the English style and said that she uses French chintz in the United States, calling it more sophisticated than an English fabric.

think Americans want to think they like the English look, but they can't cope with our shabbi-ness," she said.

Manuel Canovas, a French (abric designer, said that the influence of status decoration magazines has blurred the differences in American and European tastes. "A fabric that goes well in Paris, will do so in New York and Rome," he said. "But Americans are much more open to new designs. Some of my more unusual designs I only sell in the United States."

This American readiness to ac-cept new ideas mixed with European ingenuity and savoir faire is contributing to a new love affair between European design and the American market.

Andrée Putman of France, known for her designs for New York's Paladium nightclub, Morgan's Hotel and the new Barney's store for women which will be opened in January, said, "In the United States, the hands no longer know how to do these things."

She, like other designers, has everything made at home and shipped to New York The French interior architect

Ronald Cecil Sportes, who designed the 22-floor headquarters of L'Oreal's American company Cosmair on Fifth Avenue, said, "All the office furniture sent from Europe including freight, tax, customs and installation was 50 percent cheaper than if we had bought it in the United States."

Mr. Sportes's lamps, which he designed for the living quarters of President François Mitterrand at the Elysée Palace, are selling well in the United States.

"Manhattan real estate and construction are the most expensive in the world," Mr. Sportes said. "I had to transform my European conceptions. In Europe you can construct for the year 2000. New York is in total mutation. Buildings are destroyed after 10 years. Investments have to take this progression

Another major difference, he said, is what he terms the "show business" method of renting or selling deluxe market office space. Money or function is never mentioned. They speak of the architect so or a Monet. He is a star. The building is sold on a presentation of his work as living history, and if you want to be part of it, you'd better be there," he said.

The insistence on the personality of the designer may be startling at first to French designers, long ig-nored at home, but they quickly realize the benefits. "We're welcomed like kings,"

said Jean-Michel Wilmotte, anothwasn't friendly. er of the Elysée Palace designers who is designing luxury bathrooms for a U.S. manufacturer. house off the market and redeco- selves. Mr. Jefferies commutes by

(Continued From Previous Page) a gross basis. No deductions are allowed and the tax rate is set at a

flat 30 percent. The rules for establishing whether a foreign individual, partnership or corporation has a U.S. trade or business are not precise. But generally, the more substantial the investment, the greater the involvement in business activity, or, in the case of rental property, the shorter the leases and the more numerous the tenants, the greater the likelihood that a foreign investor will be held to be engaged in business in the United States. On the other hand, personal use of property as a residence or rental of unimproved

land does not usually constitute in-volvement in a U.S. business. However, in 1980, Congress decided that the tax rules gave foreign speculators in U.S. real estate, es-pecially farm land, an undue advantage over Americans. The result was FIRPTA, which levied a capital-gains tax on all foreign investors in U.S. real property.

FIRPTA did not include withcomplex and controversial set of Group.

reporting requirements, which, among other things, would have

required nominees to disclose the names of their foreign principals. Because of their complexity, imposition of these rules was contin-nally delayed until Congress re-

oealed them in 1984 and replaced them with a withholding tax. However, the IRS was ordered to study the workings of the amended FIRPTA and institute new reporting requirements if necessary.

An IRS spokesman, Robert Kobel, said that the revenue service was in "a wait-and-see status" and had no plans to draw up new reporting rules.

Besides the FIRPTA rules, taxes on income and capital gains from real estate may be affected by the tax treaties that the United States has with more than 30 nations. Investors claiming total or partial exemption under these or other tax laws must get approval in writing from the IRS Foreign Operations District in Washington; 1325 F Street, N.W. Inquiries should be holding but instead mandated a marked attn: FIRPTA Special

A SPECIAL REPORT ON REAL ESTATE

Nantucket: Lessons in Keeping Up Appearances

By Edith Cohen

NANTUCKET, Massachuseus — in the antique-filled dining room of the Jared Coffin House, an 1845 mansion built by a whaling fortune and now serving as an inn. the guests' conversation turns to what President Ronald Reagan's tax proposals, limiting deductions on mortgage interest payments for second homes, could mean for owners of vacation homes.

Later that evening at Bookworks, one of the few shops open on a street of gray clapboard cot-tages, a clerk chats with a customer about completing the paperwork for buying a house. And at the Brotherhood of Thieves, a sociable pub, an architect and his client review renovation plans.

It is difficult to spend much time on Nantucket, an island 30 miles (48 kilometers) off the Massachusetts coast, without falling into a conversation about the acquisition, disposition or transformation of its 50 square miles (129 square kilome-

The population, which swells Along with growth have come from 6,000 year-round residents to the usual problems of traffic conmore than 40,000 in the summer, seems to be in the grip of real estate

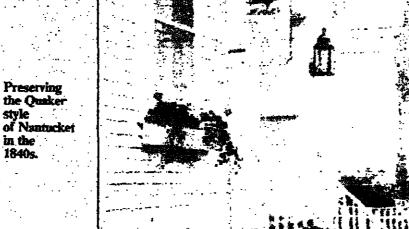

Not long ago Nantucket was a sleepy summering spot for genera-tions of New Englanders. Many grew up to buy vacation property that then became a full-time or re-

There is a prevailing sense of a distinctive small-town community that knows its roots. A resident an "off-islander" explains, "I've only lived here 26 years."

By the mid-1960s, however, after a 100-year economic trough, tonrists discovered the island. Now more than 700,000 visitors flock to Nantucket annually. With them has come a desire to own property

that has worried some islanders. Bruce Posner, a long-time visitor, said, "People once owned homes, and now they own real es-

The boom is raising sobering questions about how to preserve

sense of haven without squelching

its economic benefits. gestion, air pollution, crime and drugs. To confront these issues, Nantucketers increasingly are turn-ing to a tradition of defending their uniqueness, on Yankee ingenuity in devising legal strategies and on New England grass-roots activism, which has produced the Alliance Against Drugs on Nantucket.

On the positive side, said Bill Klein, chairman of the Nantucket that knows its roots. A resident Planning Commission, tourism who cannot answer the question of struck just late enough "to save the an "off-islander" explains, "I've island from development and Victorian architecture" and keep its identity intact.

In fact, in 1955 the island had fought for and won official status as a "historic district," ensuring that any changes would be consis-tent with the subdued nature of its Quaker origins and the pervading style of the 1840s.

By the early 1970s, however, construction was picking up, and legislation was proposed to ensure the preservation of the wild areas, as questions about how to preserve well as those on neighboring Mar-the island's natural beauty and tha's Vineyard and Cape Cod.

H. Flint Ranney, a Realtor with brokers and an owner of Jordan & Denby Real Estate, said that while the bill did not pass, it hung in the air long enough to spur fervent sub-division and building. By 1975, the planning commission was estab-

In recent years, the 212-hour boat ride from the mainland competes with flights into the island's arport. Three cruise ships visit during the season, which stretches ten-uously from the Daffodil Festival

through the Christmas Stroll. Corporate meetings are big in autumn. To earn some of the \$45 million the tourists pump into the economy, islanders rent out their homes in the summer and move in with relatives, paying rents them-

selves.

Scallop fishing is a \$2-million-a-year industry, while the construction business brings in \$20 million

Real estate has appreciated as much as 120 percent in the past five years. Mr. Runney estimates. And Mr. Klein said that sales in dollar terms have climbed 140 percent in four years, to about \$120 million.

Jenkins, put the median house price at about \$275,000. A "dump in town" could go for \$350,000. and a nice place in rown could fetch \$950,000, she said. Lots start at \$66,000. She added, "We're not being invaded by poor people." The number of permits for new

dwellings has also soared, according to Carl Borchert, the island's building inspector. In 1977, 94 were issued. A cap of 80 a year was imposed from 1980 to 1986, except for year-round residences. But because of exemptions and plans already under way, he expects to isage 300 permits for 1985.

The island, densely populated at the harbor, has tiny village-like clusters, each with its own name, scattered among farms, cranberry bogs and the wide scrubby moors that are prey to developers.

In 1963, the Namucket Conservation Foundation, a private group, began buying up land to be kept wild and held in trust for the public. Together with the Audubon Society and other naturalist Lucille A. Jordan, another of the groups, it owns about 6,000 acres, island's 300 licensed real estate or about 16 percent of the land.

INTERNATIONAL REAL ESTATE CONTACTS

If you want to establish International Real Estate Contacts in over 90 nations, consider joining the

INTERNATIONAL REAL ESTATE INSTITUTE

Membership in the Association is in one of four categories

R.I.M. — Registered International Member

S.C.V. — Senior Certified Valuer

R.P.M. - Registered Property Manager C.P.I. — Certified Property Investor

(Membership Fee is \$15000 per year)

In addition to joining other Real Estate Professionals from throughout the World who are active in and desire also to establish contacts with Real Estate Investors, Developers, Traders, Property buyers & sellers, the Members receive the International Real Estate Journal. International Real Estate Newsletter, International Property Report, Registry of Members and other Special Publications and Seminar notices.

Mountain Retreats: Where the 'Old West' Survives

By Lou Chapman

DENVER — Ask someone what comes to mind when you say luxurious Colorado real estate, and they are likely to say, "A ski chalet in Aspen" or "A house by Frank Lloyd Wright in the foothills."

But there is another type of real estate awaiting the sophisticated buyer whose wanderlust might turn westward, a type of home and a vision of land that people leave places like Aspen to find — the mountain ranch.

Lying in the valleys of some of Colorado's most beautiful mountain ranges, such real estate includes working cattle ranches, Arabian horse ranches and hundreds of unfarmed, ungrazed private acres of land. This land provides not only serenity and solitude for its owners but also is used for the private hunting of elk and deer and for flyfishing for brown and rainbow

Many of these ranches, although tucked away in Colorado's lesstraveled and less-familiar reaches. include homes as modern and luxurious as those in New York City or

"We still have gunfights down here occasionally," said Jack Carr, whose Arabian horse ranch sits in a secluded valley 160 miles (258 kilometers) south and slightly west of Denver. "It's just got a mystical beauty about it that's hard to describe. And it certainly is Old West."

On the other hand, the Carr house, a two-story home of 3,000 square feet, (278 square meters) was designed by the architect Elliot Noves and features a 280-squarefoot kitchen with cherry and Koana wood cabinetry handerafted by a local woodworker, built-in refrigerator and adjacent built-in freezer, three pantries, range, oven, grill, wet bar and lots of counter

It is a modern home in an accessible but rugged wilderness. Mr. Carr bought his ranch in 1981. He had planned to retire then and raise his horses there, but he had to seturn to Connecticut to manage the Matcon Corp., a company he founded and from which he thought he had retired. As a result, the Carr ranch is on

the market for \$1.2 million, which is high by Colorado standards for a house on 479 acres (193.5 hectares) "Our view of it is that it's clean

and quiet and stress-free." Mr. Carr said. "It gives the animals a sense of freedom and serenity, and CORPORATE

San Diego County, CA This masterfully designed and bea appointed 37-acre residential con with 2 storally hornes provides great security, privaty, elegance and scene charm. On the westerly slopes of the Logana Ms., it is easily accessible to San Diego. The original horne, designed by Frank Lloyd Wright contains 5000 sq. fr., the second newly built home of 7,000 sq. fr. in the New Orleans sayle aftern 10 rooms. A guest cortages are clustered around the lake with 45 own seland, beach and dock. A operating ferris, wheel and cortained provide whose enclave is an ideal setting for a comparate reheart. Brochure | Hrt. 715544. \$5,400,000.

1231 Stein St., Ste. 206-A Sorte Rorbern, CA 93101 (805) 963-9577 or 1-800 pv2-2222 (Outside Colodore)

our horses seem to be extremely unusual as a result of it. They're very gentle, very social."

The Carr ranch lies between the Sangre de Cristo Mountains and the Collegiate range, 13 miles down a county road that intersects a state highway. The nearest town is Cotopaxi, 13 miles to the south. Airfields are in Salida. 37 miles west, and in Canon City, 50 miles east, where Mr. Cart keeps his plane.

Ranching has long been the livelihood of the area. In 1879, Uncle T. Witcher, a Georgian, brought 5,000 Texas Longhorn steers to the meadowland of what now is the Carr ranch. Witcher, the first whiteperson known to have lived in the

property. One of the barns on the Carr ranch is a hundred-year-old landmark built of logs that has been modernized with box stalls and feed and tack rooms.

"You can find cabins in the valley that were not built all that long ago, in the 1920s and '30s, when there were 1,400 people living around there, growing lettrace and celery. Today, there are only three or four year-round families near

Year-round in the valley does not, however, mean blizzards and months of subzero weather during the winter. The home is at an elevation of 9,000 feet (2,740 meters). but the temperature is moderate. It is, after all, protected on three sides by mountains.

About 170 miles west of the Carr ranch is the \$1.1-million home of Bill and Stella Pence. The threestory, 12-room, Southwestern-style home sits amid 160 acres of forest in southwestern Colorado and offers majestic views of two mountain ranges, the Cimmaron Range to the east and the San Juan Mountains to the south.

The area has other attractions. A few years ago. John Wayne and Glenn Campbell filmed the movie "True Grit" in Ridgway, the town nearest the Pence home. And Ralph Lauren, the clothes designer, is a neighboring gentleman ranch-

"The locals call this the Platinum Valley," Mr. Pence said. The property owned by the

from Montrose, which is served by several flights daily from Denver.

Mr. Pence is director of the Telluride Film Festival, an activity of the National Film Preserve, and he recently accepted the position of director of film studies at Dartmouth College in New Hampshire.

The Dartmouth appointment led

to the Pences' decision to sell their home. The professional involvement in film explains why the house has a double-projector, professional-quality screening room in the basement.

Prices Leveling Off at Top of New York Market

By Leslie Whitaker NEW YORK — New York City's residential real estate is among the most expensive in the United States. But recent concern about potential changes in the tax code and about the strong dollar have weakened domestic and foreign demand for luxury housing. the most rapidly expanding sector of Manhattan's market.

Consequently, brokers expect the year to end on an unusually flat note and next year's price rise to be held to less than 15 percent.

Prices have been leveling off." said Henry Robbins, of Yale Robbins, a New York real estate con-

He said that "the market can only absorb so much," citing the 9.400 apartments that were built this year and the 13,700 units that are expected to reach the market next year.

But anticipated investment re-turns of about 7 percent in 1985 and double that next year are low only in comparison to the New York market's history. Condominium and cooperative owners realized appreciation rates of 18 percent or higher during seven of the last eight years, including a 66-per-cent price leap in 1978. Last year, the average value of condominiums and cooperatives climbed 28 per-

This year has been an exception, are no longer willing to pay their increased activity in the past severexperts say, because concerns landlord an average of \$2,000 a al months, due to abated concern ers still rent, but those who own about President Ronald Reagan's month for a one-bedroom apart- about the tax code and a positive proposal to reverse real estate tax deductions has weakened domestic demand, and the strong dollar has put prices out of reach for many

The Dag Hammarskiold Tower, located near the United Nations, also has a number of vacancies due to resales. Completed in 1983, this building has a large portion of foreign owners. Its condominiums, some of which have magnificent views of the East River, range in price from \$290,000 for a small one-bedroom to more than \$1 million for a duplex.

Third Avenue is fast becoming another fashionable address. A large portion of new luxury condo-

this avenue. On East 67th Street. for instance, 11 five-story townhouses the first constructed in Manhattan since the turn of the century, were recently completed. With roof-gardens, central atriums and matching marble baths, they each carry a \$4-million price tag.

A rather unusual option will soon be available in the renovated Taft Hotel, which will include 450 efficiency and one-bedroom con-dominiums when it opens early next year. Management will lease apartments for owners while they to William Zeckendorf, one of the are away. In addition, the building area's developers.

cleaners and maid service, amenities that have become standard in midtown Manhattan's luxury

Steady domestic demand has ex-panded Manhattan's desirable areas, however, as long-time residents have ventured outside central Manhattan. Strong interest has already developed in a new 92-acre (37-hectare) landfill called Battery

nearly completed 350 condominium units, which are within walking distance of Wali Street, will range from \$150,000 to \$1.2 million.

The Upper West Side, a trendy stretch west of Broadway running from the 70s up to 96th Street, is undergoing a more subtle renais-sance. Many of the older, greasy coffee shops and discount stores that lined Broadway have given way to stylish boutiques. Apartments here generally cost about \$50,000 less than similar places on the East Side.

Toronto Going In for Luxury Living

By John Allemang

TORONTO - Until recently, huxury was a rare commodity in Toronto. The Anglo-Saxons who settled the city on the shores of Lake Ontario brought with them a work ethic that quickly made Toronto the financial capital of Canada. But they also brought a puritanical streak that put work before pleasure and earned the city the name Toronto the Good.

Toronto is still a bustling, businesslike city that preserves many of the legacies of the 19th century. such as a low crime rate and tidy. tree-lined streets. But it has also learned that a little luxury is not such a dangerous thing.

Credit for this change is usually given to the influx of immigrants from Europe, Asia and South America over the last few decades. Toronto is now one of the most cosmopolitan cities in the world. with a huge social mix in its population of three million.

As a result, the traditions handed down from the reign of Queen Victoria are now open to question and the making of money is no longer an end in itself. Spending money in Toronto has become much easier and much

more self-centered. The clearest example of this is in the city's housing, which has gone from dull and dependable to spectacular within just a few years. Luxury accommodation abounds. Many older properties are being gutted and renovated to bring more light into bigger rooms.

Jacuzzi-equipped spas and solariums are compulsory in the new homes being built at a in the city's outlying suburbs. Even the cheapest apartment in the latest high-rise tower finds some way to call itself luxurious. But the most impressive luxury

housing is the condominium development that has taken over and revived much of downtown Toronto. It is not the most expensive form of housing in the city - there are plenty of estates selling for millions of dollars - but it is the most secure and maintenance-free.

Because the location of these condominiums is more central than almost any other housing in the city, they are attractive to those who want to do business quickly, as well as to those who want to find high-quality shopping, dining and

JAMES M. BROWN CO. REALTORS

utes' walk.

François d'Halluin works for a French government agency in downtown Toronto and lives with his family in a condominium project called Market Square. "When I came to Toronto," he said, "people told me to buy a house in the suburbs. But I used to live in the center of Paris and I wanted a place down-

He finds the standards of building much higher in Toronto than in Paris. He noted that the kitchens and bathrooms are much bigger than what he was used to, although there is a trade-off, since an apartment of equal size in Toronto has fewer bedrooms.

He added, "Market Square is very safe compared to Paris. There is a good staff here that looks after everything, and there is also a garage and a pool, two things you don't find so easily in Paris." Toronto winters are temperate for Canada but still cold by the

Toronto in the winter

properties for foreign buyers, who have accounted for 70 percent of sales in the 72-unit building.

While many of the luxury buildings in the city are aimed at local middle-aged couples who want to move out of a big house after their children have left home, the Residences seek a wider andience. They are located on the edge of

Lake Ontario and form the centersiece of a redevelopment known as Harbourfront that is quickly transforming an industrial port into a residential district. A 1927 warehouse forms the ba-

sis of the condominiums, which occupy four newly built floors on top of nine floors of expensive shops and offices. The building, known as Queen's Quay Terminal, was given an award of merit by the Canadian Housing Design Council in recognition of the renovation undertaken by the developers, Olympia and York Ltd., at a cost of 60 million Canadian dollars (\$44 mil-

The apartments range in price standards of Paris or London. According to Susan Wigderson, a a 1,300-square-foot (121-squaremarketing consultant, most buyers meter) one-bedroom to 693,000 ars for a take-den burke tosce room with a study and solarium. She noted that the Kuniegai Ms. Wigderson knows this from covering more than 2,000 square her experience at the Queen's Quay feet. (Taxes and maintenance fees Residences. The Residences have add another 800 to 1,300 Canadian been one of the city's most popular dollars a month.)

Foreign Investment Perks Up

By Carter B. Horsley NEW YORK - Foreign invest-

ment interest in American real exlate is reviving. In a recent interview, John R.

White, the chairman of Landaue: Associates, a leading real estate consulting firm in New York, said that "after 18 months of relative dormancy," there is now "a lot of promise for the fourth quarter and thereafter" with regard to foreigr. investment activity in the United

He said he was forecasting .: "very significant increase for next year, especially along the Atlantic Coast, from Portland, Maine, to Miami, back to the Appalachian Mountains, with some rippling of interest out of Detroit and the near Midwest because of the recovery of the automobile industry."

Much of the United States was overbuilt during the building boom that began in the late 1970s and is only now winding down, and there are substantial vacancies as a result. But Mr. White observed that because of the cautious approach of foreign savestors, their American portfolios are. for the most parı, excellent.

Mr. White and other leading experts maintained that the Japanese would be far more active than they have been. M. Leanne Lachman. § president of the Real Estate Research Corp., which is based in Chicago, said the Japanese were moving into equity investment and from 347,000 Canadian dollars for direct development of commercial real estate instead of concentrating on industrial facilities and reptal of

Gomi company was a joint venturer in the highest bid for the redevelopment of the New York Coliseum site on Central Park South.

The site is a few blocks from the Essex House, which was recently acquired from Marriott Hotels by the Nikko Group, a subsidiary of Japan Air Lines.

JAL is a co-venturer with the Oxford Development Co. in the large Quaker Riverfront Center

mixed-use project in Chicago. Miss Lachman also noted that the Equitable Life Assurance Society of the United States has four joint real estate ventures with the Japanese, who are beginning to in-

vest their trade-surplus profits. She estimated that direct Japanese investment in 1984 was about \$1.7 billion, compared with an a erage of less than \$500 million an-

nually over the five previous years. Simon Milde of the New York office of Jones Lang Wootton, a leading real estate organization, noted that the recent decline of the dollar had spurred foreign investment interest again "considera-

WALL STREET WATCH

Overseas Money Showing Renewed Interest in U.S.

THURSDAY, NOVEMBER 7, 1985

By EDWARD ROHRBACH

RLEANS, Massachusetts — Cape Cod juts out into the Atlantic here like a sharp elbow pointed toward Europe. It's a fitting place for John P. Dessauer to live and muse about world financial markets in his biweekly advisory letter. Dessauer's Journal.

Upwards of \$100 billion is invested on Wall Street by non-Americans and Mr. Dessauer, who spent 31/2 years in Zurich as Citicorp's senior European investment officer, believes they are poised again to begin buying U.S. stocks.
"I think Wall Street looks extremely attractive now to foreign

investors," he said. Foreigners shunned U.S. equities in 1984 after a long love affair that

made them net buyers on Wall Street each year since 1972, he noted, while Americans were consistent net sellers of their own companies' stock over the 12-year period. He added that 1985 has not

Dessauer disputes the notion that Europeans are not market leaders.

seen significant participation by foreigners, but in prior years "Wall Street tended to go up or go down, depending on the inflow or outflow of funds from overseas." With the Dow average at record highs, he observed, American investors are showing more optimism toward Wall Street than at any time in the last 10 years. Thus, if foreigners return to Wall Street, he sees a "powerful

force that could have a dramatic impact" suddenly developing. "In 1982 we had a glimpse of what can happen when foreign and American investors are on the buy side together," he said. "It was record foreign buying that triggered the great bull market that August."

Mr. Dessauer likes to look at the U.S. market through the eyes of the Swiss. From this perspective, with the Dow industrial average converted into Swiss francs, he said the risk in U.S. stocks is "far less than when the dollar peaked last March."

THAT'S MORE, his own index of major world stock exchanges, equally weighted to show relative sentiment, shows that Wall Street is selling at the deepest discount to

"U.S. stocks look undervalued, and my guess is that sometime soon foreign investors could begin taking profits in their own markets and move into Wall Street," he said.

Triggering a rush into New York-listed stocks from overseas, he believes, will be good news about corporate profits on this side of the Atlantic. He predicts a 20-percent earnings spurt in 1986. the result of continued strong consumer demand that by then will be focused more on home-produced products because of the weakened dollar.

He cited the example of the Frankfurt Stock Exchange, where the FAZ Aktien index jumped 52 percent in the first 10 months of 1985. This surge, he said, was "largely inspired" by a 37-percent gain in West German corporate profits over the period.

"A 20-percent expansion in earnings by U.S. companies —

which really isn't so much — could easily translate into a 25-percent rise in the Dow," he said. "That would send it up to the 1,700-1,800 level,"

While many Americans, particularly the big institutions, tend to dismiss foreigners as "laggards, not leaders," and insist that "the tail cannot wag the dog," Mr. Dessauer disagrees. He thinks foreigners are simply more astute.
"Typically, Americans look at Wall Street and nothing else,"

he said. "But for reasons of financial survival, foreigners have had (Communed on Page 17, Col. 5)

Philips Says Net Fell 27%

Despite Fall, It Sets U.S. Listing

AMSTERDAM — Philips NV, Europe's biggest electronics com-pany, said Wednesday that its third quarter net profit fell 27 percent, to 175 million guilders (about \$59 million) from 241 guilders a year earlier. Net profit for the first nine months dropped 22 percent, to 611 million guilders from 785 million a year earlier.

Despite the profit drop, the com pany announced Wednesday that it would seek to list its shares on U.S. stock markets.

Net sales in the third quarter rose about 4 percent, to 13.66 billion guilders from 13.16 guilders a year earlier. Nine-month net sales rose about 10 percent, to 41.02 billion guilders from 37.33 billion

The company's vice chairman, Johannes Zantman, said the company no longer expected to match the 1.11-billion-guilder net profit recorded in the whole of 1984. The company cited, among other things, a sharp drop in earnings at its North American subsidiary in the third quarter, "We expect U.S. results to recover in the final quarter but no longer expect to reach 1984 levels this year," he added.

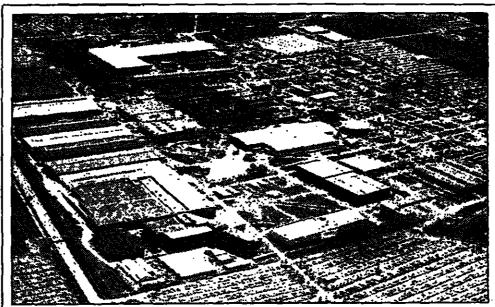

Mr. Zantman said that Philips Signetics subsidiary had performed poorly in the U.S. semiconductor market, where many companies have struggled because of intense competition from Japanese companies and from falling prices.

However, he also announced that Philips had applied to U.S. authorities to offer shares in the company on U.S. stock markets. "Despite our recent disappointing results in North America, we believe the bourse [stock market] climate is ripe for this offer." Mr.

The amount of the offering will equal about 4 percent of the existing number of nominal 10-guilder Philips shares outstanding, currently 215 million, Mr. Zantman

Philips shares closed higher Wednesday in Amsterdam despite the group's announcement of the earnings drop. The stock closed at 52.80 guilders, up from 48.80 guilders Tuesday. Dealers said the market had anticipated a much larger drop in profits.

Philips said sales and income developed favorably in Europe in the provement in operating profit outside the United States was insufficient to compensate for the drop in results in the United States.

An aerial view of the Hannover Trade Fair area

Burnishing W. German 'Rust Belt'

Lower Saxony Hopes High-Technology Can Lift Image

HANNOYER, West Germany — After Paris, this modern, drab city of 531,000 people seemed like something of a comedown as the site for the second Eureka conference. Local and national politics explain the choice.

The image of Hannover and the surrounding state of Lower Saxony is close to the general perception of northern Europe in general and northern Germany in particular as losers as technological and economic activity drains to the

Many of the area's steel, shipbuilding and chemical companies have either moved south or closed operations. Today, Lower Saxony has an unemployment rate of 11.4 percent, considerably above the national average of 8.6 percent.
"We do have an image problem," a local official

Lower Saxony, West Germany's second-largest

state in area, perhaps is best known for its rich farmland and North Sea island resorts near the Dutch coast. Its population, now 7.3 million, has generally been stable since the end of World War II, when a flood of refugees poured in from the east, Every third resident is a refugee.

Hannover, the 12th-largest in West Germany, is best-known for its international trade fair, held on grounds where the Eureka conference also met. And in sharp contrast to the prospering high-technology centers of Munich and Stuttgart, the Hannover area still is struggling to convert from or redevelop recession-damaged industries.

"This is anything but an ideal place to draw attention to Germany's high-tech potential," said Uwe Vorkötter, an economics editor at the newspaper Stuttgater Zeitung. "But they seem to be

trying to change their image."

Ministers from 17 European nations last met in Paris in July to discuss Eureka, the French-led

(Continued on Page 17, Col. 6)

ITC Meeting **Ends Without** Tin Solution

LONDON - The International Tin Council adjourned Wednesday an emergency meeting here without making any headway in its attempt to end the chaos in the world's tin

industry.

Delegates said that the ITC members will reconvene Thursday and again next week in an effort to find enough funds from their 16 financial backers to resolve the cri-

The purpose of Thursday's meeting is to finish Wednesday's discussions and issue a statement giving what delegates called "general assurances" regarding the ITCs efforts to end the crisis that began two weeks ago when the council rain out of funds to continue propping up world tin prices.

The only thing that makes a meeting tomorrow worthwhile is that the ITCs member governments are willing to bonor their obligations," said Angus MacMil-lan, a senior metals analyst at Shearson Lehman Bros. "Otherwise there is little point."

A conditional "rescue plan" pre-sented to the ITC by its creditors has provoked complex and frag-mented reaction from the council's six exporting and 16 importing

The creditors said that they expected a reply to their proposal by Friday morning. But trade sources said Wednesday that that seemed <u>nalikel</u>v.

Earlier Wednesday, the LME chairman, Jacques Lion, sent a letter to Peter Lai, the ITC chairman,

World Tin Production

saying that "the tin industry world-wide is in complete disarray."

I am under extreme pressure from my board, committee and all

members to impress upon you that time for academic discussion is al-ready long past," Mr. Lion said. He also said that he was under pressure to consider discussions on closing London's tin market permanently.

"I have to tell you that I find it increasingly difficult to resist this pressure," Mr. Lion said. "In both monetary and turnover terms, tin is the smallest and least important of our commact markets."

The ITC has so far given no indication of whether or how it will honor its commitments to creditors and dealers, estimated by traders at about \$300 million when tin trading on the London exchange was suspended Oct. 24.

fracing also remains suspended on the Kuala Lumpur exchange, the second-largest after the LME.
And in Washington, the General
Services Administration has
stopped quoting daily in prices.
While the LME's an market re-

mains closed and there is no marker for the metal's value, Mr. Lion said in the letter, it is impossible to evaluate the extent of the liabilities incurred by the buffer stock man-

Trade sources estimate that in addition to the existing buffer stock of some 62,000 metric tons (68,200 short tens), the stock manager is estimated to have agreed to buy a further 68,000 metric tons from LME brokers and other

If the tin market reopens "without precise instructions from the ITC," he said in the letter, a "cha-otic situation" could result that could force the sale of 5,000 to 55,000 metric tops of tip "at disastrously low prices." --

Tin experts from the 10-nation European Community, all ITC consumer members, have said that they would not commit themselves to meet the ITC's debts ourstanding until an independent andit has been conducted. ITC delegates said final figures, from an andit now being undertaken were not expected miti next week.

Meanwhile is Malaysia, the world's largest tin producer, Datuk Keramat Smelting Sdn and Malay-sian Smelting Corp. said Wednesday that they will resume physical tin sales beginning Thursday at be-low the ITC's floor price.

New U.S. Unit to Liquidate Bad Assets of Some S&Ls

By Nathaniel C. Nash New York Times Service

DALLAS - In a continuing effort to bolster the U.S. thrift industry's struggling insurance fund, Edwin J. Gray, chairman of the Federal Home Loan Bank Board, has announced that the board had approved the creation of a new semiprivate institution to liquidate the bad assets held by the Federal Savings and Loan Insurance Corp. The FSLIC, whose cash reserves

have diminished substantially, holds \$2.5 billion to \$3 billion of bad loans and troubled real estate tion's structure. projects, including apartment and thrift institutions.

the Federal Asset Disposition Association, on Tuesday.

The new agency is to be overseen tors, consisting of industry executives. It will be based in Denver, with the bank board holding a sizable portion of its stock and approving the appointment of its chief executive and any sales of major capital infusion was not securities. Officials of the bank guaranteed He said it was not clear board, which provides a credit reserve for savings institutions, said the directors would work up a detailed plan for the new corpora-

thrift institutions.

Mr. Gray announced establishment of the new institution, called could also be the source of a major unit will be able to hire any number

capital infusion for the FSLIC, if of real estate liquidators and pay

Mr. Gray was here to address several thousand thrift executives at this week's annual convention of the United States League of Savings Institutions. As industry executives met, their

mood was markedly upbeat. The industry is headed toward the most profitable year in its history, pris-ntarily because lower intents rates have produced a wide gap between what is paid for deposits and what is received on mortgages and other lending activities.

But two issues seemed to loom heavily over the conventioneers: the future of the insurance corporation and how to handle the 300 or that insures the safety of savings in suming job of selling hundreds of officials have complained that it is so savings and loan associations that are bopelessly insolvent.

Until the last month, "there was a feeling that everyone should band together and help work out the FSLIC's problems," said Gerald J. Levy, chairman of the Guaranty Savings & Loan Association in Milwaukee and the league's next chairman. But that is changing. The healthy institutions don't want to be saddled with the liabilities of the sick ones."

Wednesdays

FIRST

In August 1985, Research Services Ltd. released a study of the reading habits of international financial managers in Europe.* The study showed conclusively that more read Institutional Investor than any other magazine...including:

- The Economist
- Euromoney
- Business Week
- Fortune
- Time
- Newsweek Der Spiegel
- Le Nouvel Economiste

In fact, in virtually every categoryfrom job responsibility of financial manager to industry to geographic location, the story remained the same: Institutional Investor ranked first.

And if worldwide leadership is not reason enough to advertise in Institutional Investor, here is another: thanks to strengthening international currencies, coupled with a new rate structure, an advertising schedule in 1986 will cost international marketers significantly less than it did in 1985.

Put first things first. Contact your Institutional Investor account executive today. Or, contact Christine Cavolina, European Advertising Director, in London at (01) 379-7511. In New York, contact Denise C. Coleman, V.P. & International Advertising Director at (212) 303-3388.

*Co-sponsored by Business Week, The Economist, Euromoney, The Financial Times, institutional Investor International and The Wall Street Journal/Europe.

Our exclusively-designed leather pocket diary is thin, flat and elegant.

30 22 3 30e 1345

No sooner was it introduced than everybody wanted one!

The International Herald Tribune diary. started as a distinctive Christmas present for a few of our friends, was such a huge success that now we make it available to all our readers.

This ingeniously designed diary is flat as can be-neat and luxurious-including a builtin note pad. Slips into your pocket without a bulge and is ready with instant "jotting" paper the second you need it. Personalized with your initials (up to 3) at no extra cost. The perfect Christmas gift for almost anyone... including yourself.

- Note paper sheets are fitted on the back of the diary-a simple pull removes top sheet. No curled up edges. No torn pages.

— Comes with note paper refills. PLUS: Pages of useful information.

Conversion tables of weights, measures and distances, a list of national holidays by country, vintage chart and other facts... all in this incredibly flat little book.

 Note that quantity discounts are available. Herald Eribune

Le Conseil d'Administration

The Arab Republic of **EGYPT**

Ministry of Reconstruction, New Communities & Land Reclamation

Invites Proposals:

From

Qualified REFRIGERATION FACILITY Operators, Developers, Investors, and Entrepreneurs of Any Nationality for the CONCESSION to Build, Operate, Finance and Develop A 50,000 TON REFRIGERATION FACILITY IN THE COMMERCIAL ZONE AT

DAMIETTA PORT

and engage in all related business activities of the international frozen & cold food trade

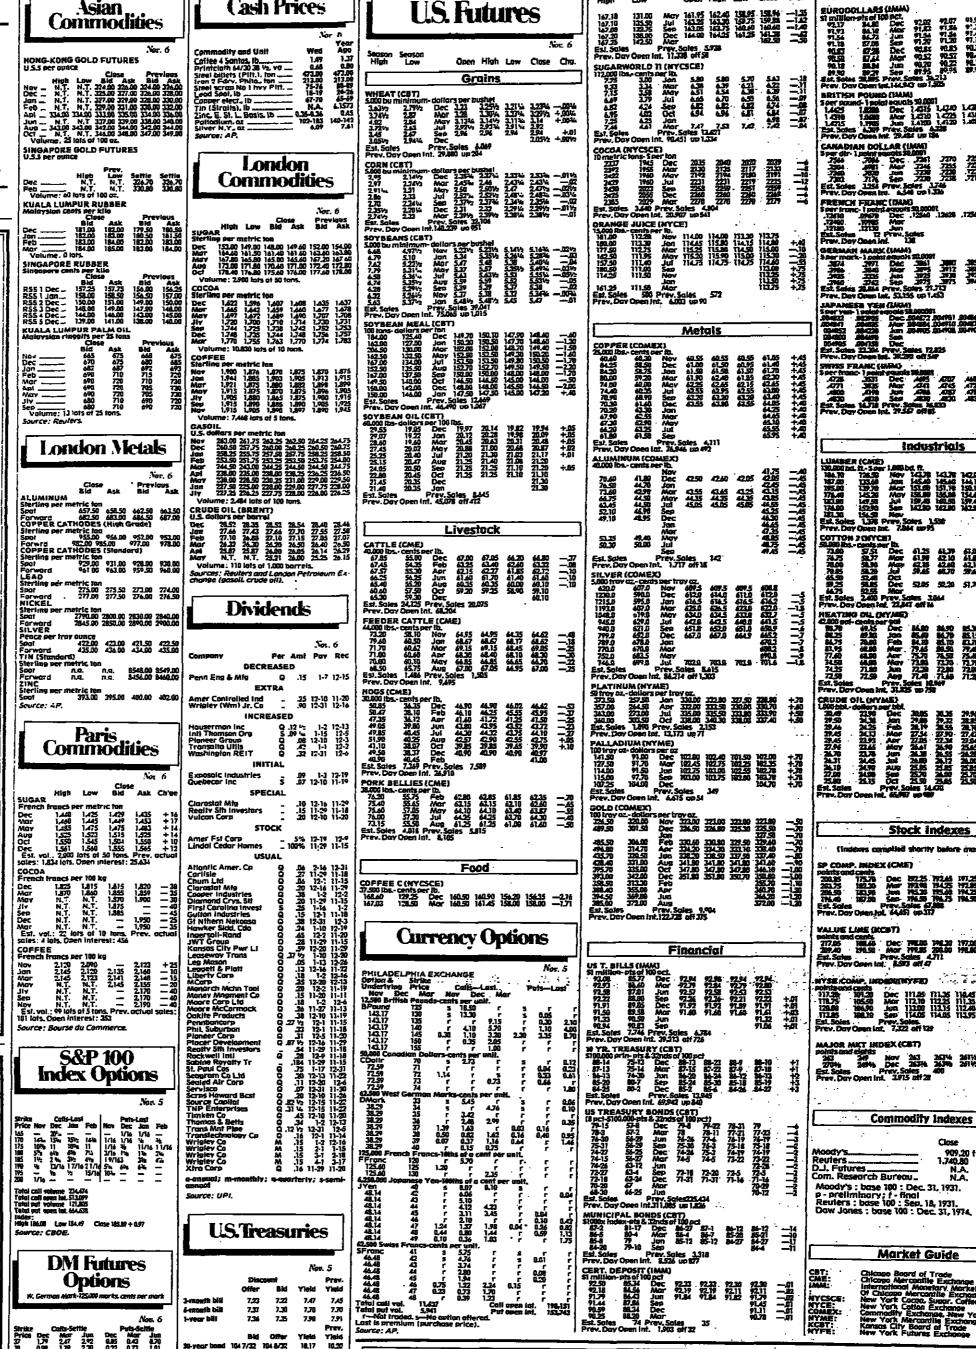

The first stage of the new port of Damiette is expected to be in operation by the end of 1985. The port is strategically located on the Mediterranean coast of Egypt between Alexandria and Port Said since it will be chiefly a transshipment center for the Mediterranean, the Red Sea and the Middle East areas with cargo fraffic from 6 to 16 million tons annually by the year 2000.

In order to insure a steady supply of imported frozen and cold protein foods available to Egypt in spite of any shortages in external supply and to take advantage of favourable international market prices from time to time. the Government of Egypt desires to provide for a strategic reserve of about 50% (fifty percent) of annual Egyptian import figures and assuming a turnover of four times a year, a total storage capacity of about 50,000 tons is

Accordingly, the Government of Egypt proposes to enter into a concession arrangement with an internationally experienced cold food trader and developer or foreign investor to carry out studies, finance, design, build, operate the facility and engage in cold foodstuff trade based in the commercial zone of the new Port of Damiet-

The Terms of Reference (TOR) providing complete details and proposal requirements may be purchased for LE 135 or US\$ 100 from the Research & Studies Organization of the Ministry of Development, 2nd floor, 1 Ismail Abaza Street, Garden City, Cairo where proposals should be submitted.

Technical and sealed financial proposals based on the TOR only will be received until monday 17th February

ADVERTISEMENT FOR ELECTRIFIED RAILWAY RAPID TRANSIT TRANSPORTATION SYSTEMS BETWEEN GREATER CAIRO, ALEXANDRIA & NEW CITIES

Change for the day: + 0.22 Average yield: 9.45 %

Source: Merrill Lynch

The Arab Republic of **EGYPT** Ministry of Reconstruction, New Communities & Land Reclamation

New Communities Authority

Invites prequalification from:

Firms (consortium) specialized in studying, manufacturing, con-structing and management of rapid transit, electrified railways; with facility of financement of any nationality.

For the purpose of project: study, providing necessary equipments and construction of three electrified railway transportation rapid transit systems to link: - Tenth of Ramadan city with greater Cairo (length about 40 kilo-

Sadat City of greater Cairo (length about 90 kilometers); - New Amereyah City with Alexandria (length about 45 kilo-

The form of prequalification can be withdrawn from: Develop-ment Research & Studies organization, I Ismail Abata St., Building of Ministry of Reconstruction, 2nd floor.

The prequalification form can be withdrawn against the payment of 135 LE or \$100, beginning from the date of advertisement: Sealed full and documented prequalification files will be received until Thursday, December 12, 1985, at the above mentioned address (prequalification form withdrawal). Oman Reduces Crude-Oil Prices

i miel Press Internatuma: TOKYO - Oman, an independent Gull oil producer, has lowered the price of its crude by 17 cents to \$27,20 a barrel in 2 shift apparently caused by higher output from OPEC, oil m-

dustry sources said Wednesday. Oman apparently decided to act after output of members of the Organization of Petroleum Exporting Countries surged more than 2 million barrels 2 day in October following a stalemate over pricing and output at the cartel's summit meeting Oct. 4, the sources said

Although Oman is not an OPEC member, it follows the lead of member nations. Non-OPEC Mexico and the Soviet Union increased their crude oil prices as of Nov. I.

By selecting Hannover for a secand conference, Chancellor Helmut Kohl of West Germany was Eureka projects," she said. attempting to accomplish two things, according to German govservers.

First, he sought to boister his Christian Democratic Union party, which faces a tough and crucial state election next June, Second, Mr. Kohl wanted to boost Lower Saxony's premier. Ernst Albrecht, a close friend. Mr. Albrecht, who first was elected premier in 1976, was a CDU candidate in 1979 for the chancellorship and is expected man and foreign companies to the research and training center in apto try again for the office if Mr. state in what Mrs. Breuel described plied micro-electronics in Bruta-Kohl decides not to seek re-election m 1987.

Mr. Kohl's coaliuon fears that if the opposition Social Democrats win the provincial elections next June, the Kohl coaliuon could lose control of the Bundesrat, the upper house.

Unemployment is expected to be the predominant issue in the cam-

Flanked by the premier in his opening address Tuesday, Mr. Kohl praised the Albrecht administration, which, since it won an absolute majority in the state legislature three years ago, has "set fine examples in the development and application of new technologies, Mr. Kohl said.

Equally important, Mr. Kohl sought to emphasize that southern German states, notably Bavaria and Baden-Wurttemberg, have no monopoly on high technology and that there is hope for the north. State officials were delighted with the gesture,

We know a lot of our industries have gone south, but our reputation for being an agrarian region simply is unjustified," said Birgit Breuel, Lower Saxony's minister

MOVE YOUR SHADOW: South Africa, Black and White

By Joseph Lelyveld. 389 pages. \$18.95. Times Books, 130 Fifth Avenue. New York. N. Y. 10011.

Reviewed by Vincent Crapanzano

A NYONE who has managed to withstand what Joseph Lelyveld calls the "riot of cuphemisms, analogies and fatuous forecasts" with which white South Africans like to demonstrate their decency is left with a heap of broken images. Like the memories of an imbelievable nightmare, these images demand some son of exorcism. "Move Your Shadow" is in some ways an attempt at exorcism. Lelyseld expresses the anguish, anger, confusion and frustration he felt during the years he was writing from South Africa for The New York Times. His book is, however, no self-indulgence. He rarely sacrifices the events he describes to his own reactions. He is the impassioned vehicle through which the "heap of broken images" — my reference is to Eliot's "Waste Land" — form an extraordinary picture of South Africa.

As a foreign journalist, Lelyweld came to know South Africa the way no South African, white or black, can know it. Within limits he could cross the psychological and legal barriers of apartheid and see the contrasting worlds of whites and blacks, coloreds and Asians. "The difference can be between an 'international' hotel and a squalid rooftop barracks for black migrant workers that is periodically raided by the police. Or it can be between white bus stops conveniently located near the main shopping areas and black bus stops hidden away at the edge of town."

To readers bombarded with daily death counts from South Africa, pictures of mutilated children and reports of torture, Lelyveld's contrast may seem anemic. But that is just the point. Apariheid determines the texture of everyday life. It grinds down the dignity — the sense of possibility — of those it discriminates against, and it deprives the privileged of clan and self-esteem.

The whites spin webs of rationalization around themselves. Lelyveld calculated that a copy of the printed laws and regulations of apartheid weighs more than 10 pounds! Vast sums are wasted in maintaining its awkward structure. The South African government spends more on subsidizing the bus trips of workers from Kwa Ndebele to Pretoria than on any single development of that wretched

South African whites have mastered the rhetoric of apartheid so well that they often dupe themselves. Lelyveld describes the "capriciousness of a system that can ban a mug (on which political slogans have been scratched) and release a poem, torture one -activist and seem to ignore another." This capriciousness keeps "enemies constantly off-balance while enticing potential collabora-tors," and, I would add, confuses such outsiders as the American bankers who seriously expected P. W. Botha to announce meaningful reform in August.

Of Hendrik Verwoerd, apartheid's prime

mover, Lelyveld writes: "He sounded reasonable because he spoke in svilogisms; the premises were batty, but the conclusions were what his audiences yearned to believe." No wonder there is so much legalism. Logic covers for desire, and in that way no white has to question the pramises upon which his South Africa is constructed.

"A system that has to justify to itself its use of harsh interrogration methods." Lelyveld observes, "cannot easily reserve them for saboteurs and assassins, for it has need to incriminate anyone it suspects in the seemingly illimitable conspiracy that threatens its continued operations. Once a suspect has been tortured, the interrogation has to be continued until some shred of evidence vindicating the torture's use has been extracted."

Violence seems to offer the whites one escape from their endiess chains of rationalization. Lelyveid notes ironically — he was writing before the latest rioting — that "the major arens of interracial violence remains the highways where the death rate. . . is at least four times what it is in the United States, with blacks, who own fewer than 15 percent of the vehicles, accounting for more than 60 percent of the deaths — a statistic that can only partly be explained by the alleged carelessness of black pedestrians, who are the main victims. For more and more blacks, violence appears to be the only means to bring about significant change. For them the question is how to make a commitment that will be more than a sacrifice, particularly when so much of the world. assumes that a solution to South Africa's problems will have to come from the whites. Lelyveid paraphrases Winnie Mandela: Constinctive engagement means "telling blacks to call off their struggle because the bosses are working it out."

So psychologically powerful is apartheid that violence seems also to provide the only contact between whites and blacks. There seems to be no real understanding between them. A white woman, on some philanthropic mission to a Cape Town squarer commun spoke to a black man there in baby talk. "We sorry you not have house, permit, warm clothes like us. We 'very' sorry." The woman meant no harm. She saw only a victim. The black man's response was a dismissive. "Oh."

After the Bulawayo massacres in Zimbubwe, Lelyveld forced himself to visit the refrigerator. cars filled with the dead. Among the Africans looking for their relatives, he spotted an Afrikaner in powder-blue shorts and matching knee socks with his two adolescent sons. Lelyveld imagined he was showing the boys what blacks do to themselves when they rule.

But, he learned, the Afrikaner had brought his sons to see the dead firsthand so they would stop making wisecracks about the recent killings. "I bring my soms here to see firsthand what they are speaking. . . . I just want them-selves to feel, 'Hell, this is terrible,' "he said. "I want them to stop talking about it, really. Lelyveld assumed he was speaking for peace and humanity. But perhaps he meant simply there was nothing to say. The horror, Lelyveld tells us, is that it can all go on indefinitely.

Vincent Croportions is the author of "Waiting: The Whites of South Africa." He wrote this review for The Washington Post.

BRIDGE

By Alan Truscott

The diagramed deal would have no particular interest at team play or in rubber bridge but brought out two of the significant features of match-point scoring - overtricks and the no-trump ad-

South's auction, as shown, began with a Precision Club, which, in it's style, has a 17point minimum. North had barely enough for a positive response, and showed his dis-tribution by bidding spades, diamonds and finally clubs. He eventually passed the invitaional raise to four no-trump, and the parmership had avoided the obvious 5-3 spade fit.

It was not difficult to make 10 tricks, but it needed careful tricks and a top score. timing to maximize the overtick possibilities. The heart queen was led and taken with the king. The king and queen of diamonds were cashed; and a diamond was led to the ten. Taking the diamond ace would have been premature, and

South finessed the club jack. Then followed a chib to the king, the diamond ace and another club finesse. When the club ace was cashed, West had 10 part with his established diamond winner, to protect the major suits.

South promptly played the ace and another spade, forcing West to lead form the jack of

hearts and so collecting

Cavs Spoil Lakers' Party

Compiled by Our Staff From Dispatches INGLEWOOD, California — If its confidence, and Coach George the Los Angeles Lakers win another National Basketball Association title this season, they might plan to send the championship rings through the mail and hang the championship banner in private. Commissioner David Stern pre-

sented the Lakers with their 1984-85 rings and their title banner was

NBA FOCUS

unveiled in a 25-minute ceremony at the Forum here Tuesday night. A couple of hours later, Los Angeles lost for the first time this season, by 129-111 to the Cleve-land Cavaliers, who won for only the second time in six games.

"It was the same kind of ordeal that we went through three years ago," said Laker Coach Pat Riley, referring to a 132-117 loss to Golden State after a similar ceremony in

"We were playing a team hitting 45 percent," said Riley, after watching the Cavaliers shoot 67 percent. "We wanted them to beat us over the top. They did the job in the trenches."

"I was feeling great, receiving the ring and remembering what the championship meant," said Earvin Johnson, who led Los Angeles with 23 points, eight rebounds and eight assists. "We know everyone will be gunning for us. The Cavaliers shot 67 percent to our 42 percent. We won't win any games shooting like

Other NBA winners Tuesday night were Utah, Milwaukee, Denver, New Jersey, Houston and Seat-

Cleveland's 1-4 start didn't flag against the Lakers. "The guys know they can play with any team." Karl said. "It doesn't matter if it's the Lakers or the Ceitics. We believe we can win."

Cleveland got stellar performances against Los Angeles from point guard John Bagley and Edgar

Jones, a backup forward-center, had 24 points and 12 rebounds, while Bagley added 20 points and

"We felt we could run with the Lakers, and Bag had a great night." Karl said. "It's a great victory. Last year we came in nere after winning six straight and got blown out by 25. It's strange, but we play better on the road. We have not won at home yet, and this is our second win on the road.

"We stay mentally into the game on the road. I don't know why. Maybe because we are away from

Cleveland led, 37-30, after one quarter, and hit its first 13 shots in the second period before moving out to a 75-57 buige at halftime. The Lakers, now 4-1, never threatened in the second half.

"You can't make mistakes against them." Jones said. "We kept ours to a minimum.

I won't say they thought I was the weak link, but they were leaving me open for my shot," said Jones, who is averaging fewer than nine points per game for his career. "We came to play as hard as we could. We aren't going to be blown away anymore. We are earning our respect in this league." (AP, UPI)

Astros Hire Hal Lanier To Manage

The Associated Press HOUSTON (AP) - Hal Lanier, a coach for five years under Manager Whitey Herzog of St. Louis, has signed a two-year contract to manage the Hous-ton Astros, the National League baseball club an-

nounced late Tuesday.
In replacing Bob Lillis, who was fired Oct. 7, Lanier becomes the ninth manager in Astro history. Houston finished third in the Western Division in 1983, tied for second in 1984 and tied for third last season.

Lanier said he would like to convert the Astros into an ag-gressive, base-stealing team. "I don't like to see a club that goes buse-to-base," he said, "and i think that's the type of club the Astros have been.'

Lanier hopes to hire veteran manager Yogi Berra as an assis-tant coach. "I talked to Yogi yesterday," he said, "and we think he'd be a good addition. It would be nice to have him there ıl l want to ask a question."

An infielder, Lanier ended his major-league playing career in 1973. As a minor-league manager in the Cardinal sys-tem, he led Gastonia to the Carolina League title in 1977, and in 1980 took Springfield to the American Association championship. The son of former Cardinal pitcher Max Lanier, he joined the St. Louis staff as a coach in 1981.

Haworth Spurs Capitals

LANDOVER, Maryland - The can go all over the ice." Washington Capitals have been among the best defensive clubs in ed on four of Washington's first

NHL FOCUS

the past three seasons. What they've needed is another offensive threat. It turns out that all they had to do was move Alan Haworth from right wing to center.

Haworth scored two goals and added two assists Tuesday night in sparking the Capitals to their biggest offensive output of the season, an 8-4 victory over the Chicago Black Hawks.

"I played there a whole lot when eague this season.

"I never really had the chance as a pro to show what I could do as far as scoring goals," he said. "Now looking to shoot more, though - York Islanders tied.

Compiled in Our Staff From Disputches It's just when you're at center, you

the National Hockey League for five goals. Chicago suli had a chance to pull the game out in thethird period after trimming the def-

But there are reasons the Black, Hawks are 4-7-1. "Our specialteams aren't doing it," said Coach Bob Pulford after watching his team score on only one of eight power plays while allowing the Capitals to convert three of six.

Doug Wilson had his own explanation. "It's the litte things that killed us - stupid penalties like mine." Wilson drew a penalty at I was in junior." said Haworth, who 11:14 of the final period, when Chiwas moved to center two weeks cogo appeared to have the Capitals ago. He has goals in six straight on the ropes. In the next 35 seagames, the longest streak in the onds. Washington scored twice in extending its winning streak against the Black Hawks to five games.

Other NHL winners Tuesday I'm not only scoring. I'm getting night were Quebec, Montreal and just as many assists. I'm really not Edmonton; Calgary and the New

Stately New York Homes

WASHINGTON — Years ago when Jackie Onassis was the first lady of the United States, she conducted a TV tour of the White House. My sister was so inspired by the event that she gave me a tour of her three-room apartment in

I was under the impression she had retired from the stately home business until I received a call from

her the other day. "The British swells have sent their greatest art treasures to the National Gallery Gallery in Washington this month, she said. What are we sending them in return?

Buchwald "Nothing spe-

cial that I know of," I said. 'That's what I thought. My girlfriends and I have a great idea. In exchange for the English lending us their heirlooms we would like to ship them treasures from the homes of Flushing. New York."

"You told me the people of Flushing would never let their heirlooms out of their houses."

We're now willing to do it provided they are insured by Lloyds of London. "Who is we?"

"A few homeowners in my neighborhood. We call ourselves the 'Magnificent Six.' We would have been the 'Magnificent Seven' except Martha Bordinsky's slipcovers won't be ready for months. The thought we had is that if the British are willing to display what they have in their stately homes we should give them some idea of what

"What art treasures are you prepared to send to them?" "I'm willing to lend The Blue Boy' - the one I bought in a garage sale in Astoria last vear.'

Pacific Folk Art Sold to Japan

The Associated Press LONDON -A collection of Pacific folk art, including canoes, masks and weapons, has been bought for £600,000 (about \$857,000) by the National Museum of Ethnology in Osaka, Japan, Newcastle upon Type University announced Tuesday.

original 'Blue Boy' or not?' The man who sold it to me said if it wasn't the original it came willing to part with treasures. Doris Dembow wants to send a needlepoint sampler which she made her-self, titled 'God Bless Our Home."

"That's classy. The only place I've ever seen anything like it was in a Hallmark greeting card shop."
"Barbara Lupin has offered to part with a color photo of her

grandchild. She says it has never been shown in public before. But she won't lend it unless a guard is stationed in front of it day and

"The Tate Gallery has plenty of guards. What other treasures would you like to send to London?"

"Laura Brown has a pair of Ron and Nancy Toby mugs which she purchased in Atlantic City. They were crafted by skilled artisans in Hong Kong, and the shopkeeper told Laura that they were already collector's items."

"I may be wrong, but I don't believe the British have ever seen a Hong Kong Toby mug before."
"What we're trying to do is orga-

nize our treasures so that it gives the English some idea of how the bluebloods live in Flushing. We have Myra Stieglitz nearly talked into parting with her queen-size sleeper sofa. It's an heirloom because it has been used by three generations in her family."

What is so special about it?" "In the daytime it can seat three people, and at night all you have to do is remove the cushions and it turns into a bed."

"Why is Myra hesitating?"
"She is afraid if the Tate Gallery borrows it, her kids' friends won't have anyplace to sleep when they come home on school vacation."

"You seem to have everything under control. Why did you call

"The girls wondered if you would contact Prince Charles and Princess Di and ask them to stop by to preview our art treasures on their way to Kennedy airport." "I would be happy to. One more thing. I'm curious about how you

selected the masterpieces for the "We all closed our eyes and thought of England."

Portrait of the Artist in a Platinum Hairpiece

Washington Past Service
WASHINGTON — The plat-VV inum wig is perched like a Pekingese above his own black hair. His dry lips float in a face the color of chapped hands. It's Andy Warhol, king of the club crawlers, Lazarus of the underground gone uptown, and for the next week, prisoner of his own

"My editor is making me do is," he says cheerlessly, "so I this."

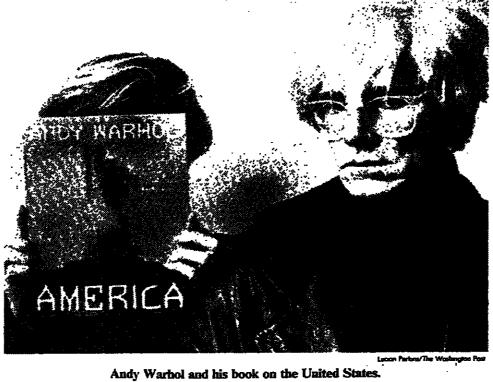

Somewhere deep inside his huge black leather jacket ("It's Calvin Klein, but I only wear Stephen Sprouse"), his shoulders sag. His book editor, who looks a bit like Tab Hunter, hovers nearby. Warhol licks his lips, his dark eyes glitter behind the neon-pink glasses. It is a painful sight: portrait of the artist waiting to have his teeth drilled.

The new book is called "America," a collection of photographs of the fey and famous, and pensees like this (flanked by a picture of Howdy Doody):

"What I don't understand is why every time an underdeveloped country starts to get developed, the first thing they do is manufacture knickknacks and send them over here. I mean stuff like musical toilet paper dispensers and calculator pens. Who gets them started making these things? Why don't they show them how to be self-sufficient foodwise?. . . It ends up that we're sending guns and food to the world, and the world is sending us doodads."

He promised everyone 15 minutes in the spotlight, but he's been cruising the fame lane for more than two decades, the prince of Pop Art, the Campbell's soup can man. He is signing copies and doing interviews in Washington, then on to Detroit. Chicago and Los Angeles. It is going to be rough sledding because he can't think of much to say about the book. Answers to questions trail off into desperate silences. He looks at his hands, smiles politely, cocks his head. "There are people who really love to talk, and they should. I never think I have that much to say."

There is a long silence. A siren wails outside. Somewhere people are having fun. "Well," he begins again, lifting a hand toward the song."

window, "it's so beautiful down

Outside the Govinda Gallery in suburban Georgetown, the young and the restless have begun to line up for the book signing. Most of them well under 25. Curious, reverent, excited, waiting patiently for the Bruce Lee of bland, shrewd as the neighborhood loan shark, a pale, weak-eyed water bug quivering his way across the fluid surface of American life.

"It's near," says a pilgrim. "It's not like the Picasso stuff where you can look at it for hours and not be able to figure it out.

The Govinda Gallery has the Warhol franchise in Washington. Huge silk screens line the walls: endangered animals, the Cologne cathedral, Ronald Reagan's Van Heusen shirt ads, Judy Garland preening in Blackglama. Take one home for \$2,000 and change. "In Copies of the book are piled on Prince of Ether, the ultimate institubles, awaiting his fat, black signator. "Oh, well, um, that book," nature. "It is a work of blinding insight, a book of strange beauthe jacket note swoons. Andy at his funniest and most touching. . . . A love letter, a remembrance, an astonishing portrait of modern life."

Warhol licks his lips again and looks embarrassed. "It's a diary. Since I have no memory, I take pictures. I don't know why I don't have one. I wish I did. I don't know, I'm just missing a brain chemical that does that to me."

He was maestro of the Warhol Factory and film school, Svengali for art tarts with names like Viva, Pope Ondine and Billy Name. And Edie Sedgwick, the incandescent Yankee debutante, Warhol high priestess, whose druggy decline and fall was chronicled in a 1982 biography that detailed the squalor of their world.

After the book appeared, reviewers dubbed Warhol the Andy Warhol."

graphic silk screens of Marilyn Monroe and others. He created Interview magazine, the ad-heavy tabloid. Now he is doing TV videos and modeling for Ford ("Live shows, that's what I really wanted to do, trying to get less scared and shy and stuff like that") and signing books, signing posters, silk screens, postcards, snapping pictures, parties, parties, parties. The book is bursting with pic-tures of celebrities: the McGuire

it his with his vibrant, icono-

sisters, Melvin Laird boogying. Capote in profile with black stitches from a face lift showing. Farrah Fawcett and Ryan O'Neal. "He and Farrah must be the most beautiful, most American couple," the text croons. Phyllis George, "Aspen's John Denver," Nancy Reagan, Ronald Reagan, Ron Reagan Jr., Doria Reagan, fots of Reagans. Nancy Reagan calling Warhol by his first name. A shy gry, Mr. Main-stream, Andy Worksholic.

"Everything that seems wild becomes mainstream today," ex-plains Craig Nelson, a book editor. "Nowadays every issue of People magazine covers at least one eccentric person and David Letterman has a whole show somebody's on every night. There's always a thing about downtown moving uptown.

Why does such a shy guy go out so much? Before Warhol can answer Christopher Makos, photographer and Warhol protege, self-conscious imp, whirls from his perch at the other end of the room and answers: "To make money."

The art critic Calvin Tompkins once described Warhol, who grew up, by the way, in McKeesport, Pennsylvania, the child of Czech immigrants, as having pursued fame with the "singlemindedness Truman Capote once wrote of Warhol: "I think Edie was someof a spawning salmon." Warhol dismisses that, saying that he just thing Andy would have liked to likes meeting new people. "I try with the magazine to meet new people and faces and fashions. Uh, it's like every day's a new type of man who always wants to

> He brightens visibly for the first time in an hour when told that Interview is one of the magazines to be included on the royal night table during the three-day visit of Prince Charles and his wife Diana. "Oh, really? God!"

Fashion Extraraganza Held for Famine Lictims

Boy George Shower and Should nights and Michael Caine guard of comfortable down the carrain in a dimer jacket as the findion incotry threa an estrategrada com-plete with fireworks in Lordon to raise money for African language vicnims. Eighteen of the world's lending designers paraded crashors Tuesday ranging from stack gold lame evening gowns to united free sers and jackets, in what was belied as the biggest fashion show that staged. The organizers, including Bob Geldof, of Live Auf fame, hope to raise \$1.4 million from ticket and T-shirt sales and donations, plus \$2.8 million by selling viders of the show and Fashion Aid T-shirts b. the designers.

Jewish protesters will continue to block the staging of a controversial Rainer Werner Fassbinder play, a spokesman for the Frank-furt Jewish community said Tuesday, while theater critics argued that the play was not anti-Semitic. Michel Friedman said that the Jewish group would stick to their plan of blocking the performance of the play, "Der Müll, die Stadt und der Tod" (Garbage, the City and Death), whose premiere was can-celed last Thursday after Jewish ticket-holders occupied the stage, and postponed again Monday. After watching a rehearsal of the play conducted for journalists and the ater critics on Monday, many concluded the play was not anti-Semitic. They said that the staging de-emphasized the central figure. and focused instead on the life of a prostitute befriended and later killed by "the rich Jew." The premiese is currently set for Nov. 13.

José Caballero, 24, a furniture store deliveryman who won \$2 million in the California lottery this week, may also have won a free trip back to Mexico. Caballero is in the United States illegally. "He's no different than any other illegal alien." Harold Ezell, regional commissioner for the Immigration and Naturalization Service, said in San Jose, California, on Tuesday. "He will not get preferential treatment nor get ignored by us because he won all this money." Ezell said Ca-ballero has two choices. He can return to Mexico voluntarily, or face a deportation hearing before an immigration judge.

REPUBLIC OF MALAWI CONSTRUCTION OF THE CHAMPHOYO-MBOWE SECTION

ANNOUNCEMENTS

OF ROUTE M12 CONTRACT NO. 21/83

PRE-QUALIFICATION OF TENDERERS

The Republic of Malowi has applied for a Credit from the African Development Bank (ADB), part of the proceeds of used to con men standard a section of the main north-south road between Champhayo and Mbowe, together with a spur from the main road to the town of Mamba.

The works are located in the northern region of Malava and the total length of road to be constructed will be approximately 65 talonieties, comprising the 47km Champhayo-Mbawe section and the 18km Mizimbo spur.

The Champhoyo-Mbowe section runs northward from Champhoyo, which is some 290km from the capital, Libraywe, to which it is connected by a surfaced road. Mbowe lies southwest of Mazzu, the main urban center of the Northwart Region, to which it is linked by 17km of surfaced road. The new disprensit generally follows the existing unsurfaced M12, running through hilly terrain, ranging from 1500 to 1800 meters above see level.

The Mainba spur departs from the ensing surfaced main road at a point some 35km to the south of Champhoya and generally follows the existing unsurfaced MI through easy terrain at an altitude between 1300 and 1500 meters.

The surfaced carnageway width will be 6.7m with 1.5m shootders. Earthwarks will overage about 13,000 cubic meters are lidemeter on the Champhayo-Mbowe section and somewhat less on the Mamba spur. Sub-base and shoulders will generally be of natural grovel, but some sections of sub-base and all of the road base will be crushed road, the latter being topped with a two coat surface dressing. There will be a number of large pipe culverts.

Pre-quolification will be determined on the basis of financial capability & previous & current expenses in the con-struction of similar projects. Any special requirements & conditions by ADB will also be taken into consideration.

contractors who respond to this notice and con, inter alia, satisfy the pre-qual faction requirements of the Republic of

gator. "Oh, well, um, that book."

he says. "Well I just read a little

bit of it, well the book was about

Edie and I thought there was a lot

of stuff about me that wasn't - 1

had nothing to do with Edie, I

didn't really know her that long but Jean Stein kind of stuck me in

as somebody really important and

have been; he was transposing

himself onto her à la Pygmalion.

Have you ever noticed a certain

go along with his wife to pick out her clothes? I've always thought

that's because he wants to wear

them himself. Andy Warhol

would like to have been Edie

Sedgwick. He would like to have

been a charming, well-born debu-

tante from Boston. He would like

to have been anybody except

i wasn't."
